PREFACE.

THE rejuvenation of Latin must begin with the beginning. A first-year book, written a quarter of a century ago, revisions and imitations of the same and so-called Caesar books written on this antiquated plan, depend for interest as well as for apperception on English Grammar, about which the beginner knows little and cares less. After a year of remorseless grinding of forms and rules set in no relations of recognized utility and possessing no human interest, the survivor of this grilling process enters upon the second year's work not only "emptied of all desire to learn," but endowed with a mental attitude of hostility towards Latin. Unaccustomed to finding any vital significance in what he has been doing in the first year, he fails to respond to belated efforts to interest him in really attractive editions of Caesar, for the enjoyment of which his preparation has not only been utterly incompetent but positively prejudicial.

The authors of "Caesar's First Campaign" have earnestly endeavored to make first-year work interesting and valuable in itself, with a view to lessening the "mortality" in the first year as well as to giving the beginner such a mental attitude and equipment as shall make his subsequent Latin course pleasant and profitable. The beginner's natural love of a story, his elementary knowledge of geography and history, have been from the earliest pages depended upon for the promotion of interest and apperception. Through the use of illustrations and suggestive introductory lines a sustained effort has been made to keep the story idea before the pupil. Those who disapprove of the use of such devices in connection with the work of memorizing forms and

21730B

principles may profitably recall how powerful an educative force in economics was the political campaign of '96, how stimulative of geographical knowledge has been the recent polar controversy.

The special features that it is believed will make for the success of this book may be briefly summarized as follows :

Interest is awakened and maintained by the development of a story illuminated by appropriate illustrations.

Apperception as well as interest are promoted through geographical and historical rather than grammatical notions.

Development Exercises are provided, breaking up the Caesar text to follow in the next lesson into short and easy sentences, with whose forms and constructions the pupil is already familiar.

The Vocabulary is scientifically selected and is limited, not "principally," but exclusively, to Caesarean words.

A select list of 500 words used six or more times in Caesar is designated in heavy type as words to be memorized.

The Exercises for Practice and other reading Exercises are carefully calculated to utilize each word of the list of 500 six or more times.

Daily assignments of Written Work are given, inflecting in various ways this list of 500, furnishing drills of exceptional merit and saving the teacher the burden of written assignments.

As far as is practicable, the pupil is required to construct his own paradigms after having been given the necessary principles rather than to memorize quantities of printed forms.

Reviews occur recalling the frequently recurring words through derivatives and affording further drill upon these words through ingenious mechanical devices of demonstrated worth.

Rules and principles are taught inductively and concretely without presuming upon more than the most elementary knowledge of English Grammar on the part of the pupil.

The most elementary notions of English Grammar, such as the distinction of voice, are taught as new material as they occur in the lessons. No attempt is made in a "Grammatical Intro-

duction" to teach in a day what was once taught through years of toilsome drill in formal English Grammar.

The vocabularies are arranged, not in the conventional alphabetical order, but with regard to pedagogical principles—nouns together, then verbs, etc.

Pointed questions in the Latin-English exercises call for answers in Latin and serve a threefold purpose: (1) to punctuate the essential nature of the construction newly taught, (2) to recall the facts of the story already studied, and (3) to force the pupil not merely to translate English into Latin, but to compose a Latin expression of his own ideas.

The authors desire to acknowledge a large measure of indebtedness to Professor Gonzales Lodge of Teachers College, Columbia University, for his generous permission to make free use of his invaluable Vocabulary of High School Latin as well as for numerous suggestions of value in the compilation of the book; also to Principal George Swain, of Bay City, Michigan, for the permission to use his excellent photographs of the scenes of the campaign. Many suggestions of value are due to William T. McCoy, of the Wendell Phillips High School, Chicago, and to Miss Ella G. Marthens, of the Shortridge High School, Indianapolis; to Dr. A. F. Nightingale, Superintendent of the Cook County (Illinois) Schools; to Francis H. Lee, of the Central High School, Philadelphia; and to Mrs. C. P. Olmstead, of the Lake View High School, Chicago.

SUGGESTIONS TO TEACHERS.

IN presenting to the educational public a text-book of an unconventional type, containing many novel devices for the promotion of interest and apperception, for the acquisition of vocabulary and forms, and for the formation of proper methods of attack in translation, the authors desire at the outset to make an appeal for the sympathetic coöperation of the teacher, and to beg the indulgence of discussing in some detail those features of the work requiring attention in order to get the best results from its pursuit. The teacher who looks upon devices calculated to add attractiveness to his subject as a waste of time is comparable to the teamster who lacks the time to oil his wagon axles. Insistence upon the constant use of maps and of all legitimate helps to the understanding of the story, will surely be repaid in a greatly increased capacity for progress on the part of the class.

The same may be said of the time spent with the class in giving helpful hints as to the preparation of the next day's lesson. All model sentences and observations in the first half of a lesson should be read over with the pupil in advance. Attention should be repeatedly called to the importance of memorizing the words in heavy type in the vocabularies, to any peculiarities in their inflection and in the next day's Written Work to keep the pupil from falling into pitfalls of error. In the second half of a lesson, the benefit to be derived from English-Latin exercises may be greatly increased by preparatory work that will rivet the pupil's attention upon those points requiring emphasis or caution. In this way the teacher makes his requirements so definite as to leave little latitude for excusable error.

The seventy lessons are intended to occupy one hundred forty teaching days. The first ten lessons are somewhat shortened, allow-

ing for abundant oral drill on forms and for emphasis on the sketches of Caesar's life, which the pupil should be required to relate in substance, as essential to interest in the narrative to follow. Beginning with Lesson XIV, the lessons admit of a natural division into two days' work, the first to comprise the reading of the text, the memorizing of the heavy type words in the vocabularies, of the paradigms, and rules, the performance of the Written Work and the translation of the Latin-English division of the Exercises for Practice. The second day's work will then comprise the writing out as a preparation for oral translation of the English-Latin division of the Exercises for Practice, the translation of the Development Exercise with review of the paradigms and rules taught in the first half of the lesson.

Especial attention is requested to the schemes for the acquisition of a vocabulary. To require the pupil to memorize and inflect all words can result only in failure. The words printed in heavy type are those occurring six or more times in Caesar, as shown by the Lodge Vocabulary of High School Latin, and should be thoroughly memorized. In the Word List (pp. 275-278), the most important of these heavy type words are assembled, while they are made to occur six or more times in the various exercises for reading. The aim perfectly to familiarize the pupil with this select vocabulary is still further attained through the Written Work, which as far as is practicable is limited to the inflection in various ways of these frequently used words. The authors have found it helpful in class to assign the Written Work in segments for board work. This board work, when corrected and rated by the teacher, encourages the diligent and enables all pupils to correct their written exercises, relieving the teacher of the burden of revising the same.

The Reviews also can be made most effective through board assignments, which like the daily Written Work when corrected and rated by the teacher will enable the pupil to correct his own home work. The authors have found it possible to devote two days to these Reviews and still have left twenty-five out of one hundred eighty-five teaching days for the reading of the text beyond the

seventy lessons. Such written tests as they have given, the authors have found it practicable to give on the second day of review work.

The original devices such as consecutive declensions, conjugations, synopses, and consecutive infinitives and participles have been thoroughly tested out and found practicable by the authors. While they may require a little time and patience on the part of the instructor to render intelligible to the pupil, they will be found to repay the effort, as even the dullest pupil will take an active interest in this mechanical form of drill and will acquire a considerable proficiency in forms.

It should be borne in mind that it is of vastly more importance to complete the seventy lessons and the ten Reviews in a thorough manner than to complete the reading of the twenty-nine chapters. The authors believe that the teacher who covers with his class only the seventy lessons — and the weakest teacher will hardly fail to do more than this — will have given his pupils a better preparation to read Caesar than can be obtained by the use of any beginning book heretofore published. At the worst, the class will have only to complete the story of the Helvetian War in the second year in a Caesar text without the help of the Development Exercises.

In conclusion, the authors wish to state that the directions contained in the latter Reviews as to the use of the Word List and Syntactical Syllabus (pp. 275–281) are intended to convey nothing more than hints as to the possibilities of their use in preparation for final examinations. These compilations will be found to afford large opportunities for the exercise of ingenuity in working out final reviews.

INTRODUCTION.

The sections of this chapter are intended only for reference. Pronunciation can be best acquired through imitation. Rules are valuable only as checks and correctives.

1. The Latin Language is so named because it was first spoken by the **Latīnī**, or Latins, an ancient tribe which lived in the vicinity of Rome. Spreading gradually as the conquests of the Latins increased, it finally became the official language of the Roman Empire, which included at one time the whole western civilized world.

During the long centuries of Roman supremacy in Europe, Latin came to have a peculiar preëminence, which no other language has ever enjoyed. French, Italian, Spanish, and Portuguese are merely the modern representatives of Latin as it was spoken in various parts of the Roman Empire. Through the Middle Ages and down to modern times, Latin was the language of learning and diplomacy. It is estimated that about forty per cent of all English words are derived from Latin.

THE ALPHABET.

2. The Latin Alphabet is the same as the English except that it has no *j* or *w*. The letter *i* does duty for both *i* and *j*.

3. The vowels are **a, e, i, o, u, y**. The other letters are consonants. The diphthongs are **ae, oe, au, eu, ui**.

PRONUNCIATION (Roman Method).

4. Vowels.

The mark $\overset{\cup}{}$ over a vowel means that it is short, the mark $\overset{-}{}$ that it is long. An unmarked vowel is presumed to be short.

ǎ is pronounced as the first *a* in *aha*; ā as the last *a* in *aha*.

ě is pronounced as *e* in *met*; ē as the *e* in *they*.

ĩ is pronounced as *i* in *pin*; ī as the *i* in *machine*.

ǒ is pronounced as the first *o* in *oho*; ō as the last *o* in *oho*.

ũ is pronounced as *u* in *pull*; ū as the *oo* in *pool*.

Comparison of the long and short sounds shows no essential difference in quality, but a difference only in the time taken to pronounce them. Hence the quantity of Latin vowels becomes important.

5.

Consonants.

c and **g** are always hard, as *c* in *come*
and *g* in *go*.

i consonant as *y* in *yet*.

s always sharp, as in *sun*, *sea*.

t always as *t* in *time*, never as in *nation*.

v always as *w* in *wine*.

x like *ks*.

bs like *ps*.

bt like *pt*.

ch like *ch* in *chasm*.

6.

Diphthongs

ae as *ai* in *aisles*.

oe as *oi* in *oil*.

au as *ow* in *owl*.

eu as *eu* in *feud*.

ei as *ei* in *eight*.

ui as *we*.

7.

SYLLABLES.

(1) A Latin word has as many syllables as it contains separate vowels or diphthongs; as, *mī-les*, *fī-ne*, *mō-re*, *fu-rō-re*, *re-sī-de*.

(2) In dividing words into syllables, note that:—

(a) A single consonant between two vowels is pronounced with the following vowel; as, *ha-bē-mus*.

(b) When two or more consonants stand together, as many are joined with the following as can be pronounced with it; as, *frā-trem*, *cō-gnō-scō*, *for-tis*.

(c) Compound words are divided into their component parts; as, *ab-sum*.

(d) Doubled consonants are separated; as, *fos-sa*.

8. QUANTITY OF VOWELS AND SYLLABLES.

(1) Vowels are long or short. The long vowels in this book are marked long. All others must be considered short.

(2) A syllable is long or short according to the time it takes to pronounce it.

(3) A syllable is long by nature if it contains a long vowel or diphthong; as, *dīcō*.

(4) A syllable is long by position if it contains a short vowel followed by the double consonants **x** and **z**, as in *sex*, or followed by two consonants, as in *pars*, except a mute and liquid. The mutes are **b, c, d, g, k, p, q, t**, and the liquids are **l, m, n, r**. The vowel in a syllable long by position is given the short sound in pronunciation; as, *sēx, pār̄s*.

9. RULES FOR QUANTITY OF VOWELS.

(1) A vowel followed by another vowel or **h** is short; as, *Gal-lī-a, prō-hi-bē-ō*.

(2) Vowels resulting from contraction are long; as, *cō-ā-gō* gives *cō-gō*.

(3) Vowels are long before **nf, ns, nct, ncs**; as, *cōnferō, cōn-silium, iūnctus*.

(4) Diphthongs are long; as, *cāusa*.

10. ACCENT.

(1) Words of two syllables are accented on the first syllable; as, *béllum, páter*.

(2) Words of more than two syllables are accented on the penult (next to the last syllable) if that is long; as, *Rōmānus*; otherwise they are accented on the antepenult (the syllable before the penult); as, *prōvíncia*.

(3) A few short words called enclitics are added to the end of other words. The accent then falls on the syllable before the enclitic; as, *Belgáque, íbísne*.

11. GENERAL RULES FOR GENDER.

(1) Masculine gender.

(a) Names of males are masculine gender; as, **Caesar**, *Caesar*; **rēx**, *king*.

(b) Names of rivers, winds, and months are masculine; as, **Rhēnus**, *the Rhine*.

(2) Feminine gender.

(a) Names of females are feminine; as, **Cornēlia**, *Cornelia*; **rēgīna**, *queen*.

(b) Names of countries, towns, islands, and trees are feminine; as, **Dēlos**, *the island of Delos*; **Rōma**, *Rome*.

(3) Neuter gender.

Indeclinable nouns, infinitives, and clauses used as nouns are neuter; as, **nihil**, *nothing*; **fās**, *right*.

CAESAR'S FIRST CAMPAIGN.

LESSON I.

FIRST DECLENSION OF NOUNS.

A FOREWORD. We are about to begin reading a story of the ancient Swiss, just as it was written in the Latin tongue nearly 2000 years ago. The author of this story, Julius Caesar, was one of the most remarkable men that ever lived. He was born in the city of Rome one hundred years before Christ. Most of the prominent Romans of the time came from rural districts, but Caesar, though city-bred, was too great to lead a life of idle pleasure, as did most of his fellows.

ROMAN BOOKS WERE SCROLLS WHICH WERE WRITTEN WITH AN IRON STYLUS.

1. In English there are three cases: nominative, possessive, and objective. In Latin there are six: nominative, genitive, dative, accusative, vocative, and ablative. The **nominative** is the case of the subject; the **genitive** generally denotes possession and is rendered either by the English possessive or by the objective case with *of*. The **dative** is usually the case of the indirect object; and the **accusative**, of the direct object. The **vocative**, the case of direct address, occurs very infrequently in Latin, and as it is ordinarily the same as the nominative in form, it is omitted in the paradigms to follow. The use of the **ablative** may be best learned from the observation of the paradigms.

2. Latin nouns are divided into five **declensions**, or classes, which are distinguished from one another by the ending of the genitive singular. In the First Declension, this distinguishing

ending is *-ae*. By dropping this ending from the genitive singular, we find the **base**, the part of the noun which remains unchanged throughout the declension, as in the paradigm below.

3. Latin nouns of the First Declension end in the nominative in **ā**. All are feminine, except names of male beings, rivers, winds, and months, which are masculine.

5.

VOCABULARY.

Memorize all words in heavy type. Use other words for reference in written work and exercises.

Belga, **-ae, m.**, *Belgian*.

(Pronounce, give G. N. C.,² and then translate, noting that several of the forms may be in more than one case and must be translated accordingly.)

I. (1) Belgās. (2) Linguae. (3) Sēquanam. (4) Fugā.
 (5) Belgīs. (6) Lingua Galliae. (7) Fugam Belgārum.
 (8) Prōvinciae Hispāniae. (9) Linguā prōvinciae. (10) Causās Belgārum. (11) Fossā. (12) Causa fugae.

II. (1) Of Gaul. (2) With the Belgians. (3) The Seine (used as object). (4) For the language. (5) To the provinces. (6) By the Seine. (7) To the Belgians. (8) Of the provinces. (9) In the language of Spain. (10) To the province of the Belgians.

¹ Observe that these words appear in the vocabulary in heavy type, signifying that they occur six or more times in Caesar according to the Lodge Vocabulary of High School Latin. There are over 600 of these words in Caesar's First Campaign. Five hundred that occur most frequently have been assembled in the Word List on pages 275-278.

² Throughout this book, the abbreviation G. N. C. will be used for gender, number, case, and is recommended for use in recitation.

LESSON II.

PRESENT INDICATIVE OF THE VERB *SUM*.

A FLOGGING ROMAN SCHOOL-MASTER.

CAESAR'S BOYHOOD. The fact that Julius Caesar was not like other city boys may have been due in part to his mother, who was a very upright and cultivated woman. She took charge of his early education and never sent him to the Roman schools, whose flogging masters were often very cruel to the pupils. She later placed him under a tutor, a learned Gaul, to whom Caesar doubtless owed his lively interest in the people of that country. As was the fashion in that day, the young Roman took a course in oratory, in which he made so marked progress that he became one of the ablest public speakers of his time.

8.

PARADIGM.

CONJUGATION OF PRESENT INDICATIVE OF *Sum*.

PRIN. PARTS: pres. ind. *sum*, *I am*; pres. inf. *esse*, *to be*.

	SINGULAR.	PLURAL.
1st Person	<i>sum</i> , I am.	<i>sumus</i> , we are.
2d Person	<i>es</i> , you are.	<i>estis</i> , you are.
3d Person	<i>est</i> , he (she or it) is.	<i>sunt</i> , they are.

9. Adjectives of the First Declension are declined exactly like nouns of the same declension. All adjectives given in the vocabulary below are feminine adjectives of the First Declension. Observe the combination *fossa magna*, a great ditch; bases *foss- magn-*. Note that in Latin the adjective may follow the noun.

10.

MODEL SENTENCES.

(1) *Nostra causa est bona*. — *Our reason is good*. (2) *Nostrae causae sunt bonae*. — *Our reasons are good*.

Observe:—

(1) that in the above sentences the subjects **causa** and **causae** are in the nominative case.

(2) that **nostra** and **nostrae**, attributive adjectives and **bona** and **bonae**, predicate adjectives, agree in G. N. C. with these nouns.

(3) that the verb in sentence 1 is 3d singular because the subject is 3d singular, and the verb in sentence 2 is 3d plural because the subject is 3d plural.

11. RULES.— 1. *The subject of a finite verb is put in the nominative case.*

2. *A finite verb agrees with its subject in person and number.*

12.**VOCABULARY.**

Memorize all words in heavy type. Use other words for reference.

Celta, -ae, m., a *Celt.*

LESSON III.

PRESENT INDICATIVE ACTIVE OF THE FIRST CONJUGATION.—
ACCUSATIVE OF DIRECT OBJECT.

THE TEMPLE IN WHICH CAESAR SERVED AS PRIEST.

A YOUTHFUL OFFICIAL.
Roman boys became voters at seventeen, but even before that age, Caesar was appointed through influential relatives to a priestly office in the temple of Jupiter, the principal god of the Romans. This gave him an honorable social position and a fixed income. Many of his young friends,

finding themselves in such comfortable positions, were so well satisfied that they made no efforts to improve themselves, but Caesar could never rest contented so long as there was any higher honor to be won.

15. Latin verbs are divided into four **conjugations**, which are distinguished from one another by the vowel preceding **-re**, the ending of the present infinitive. In the First Conjugation, this characteristic vowel is **ā**, as may be seen from the principal parts and stem of **liberō** in the following paradigm.

16.

PARADIGM.

PRESENT INDICATIVE ACTIVE OF THE VERB **Liberō**.

PRIN. PARTS: pres. ind. **liberō**, *I liberate*; pres. inf. **liberāre**, *to liberate*.
PRES. STEM: **liberā-**.

	SINGULAR.	PERSONAL ENDINGS.
1st Person	liberō , I liberate.	-ō (or -m as in <i>sum</i>), I.
2d Person	liberās , you liberate.	-s , you (or thou).
3d Person	liberat , he liberates.	-t , he (or she or it).

	PLURAL.	PERSONAL ENDINGS.
1st Person	liberāmus, we liberate.	-mus, we.
2d Person	liberātis, you liberate.	-tis, you.
3d Person	liberant, they liberate.	-nt, they.

Observe: —

(1) that the **personal endings** are so called because they take the place of personal pronouns, which are rarely expressed as subjects. The above endings are used with all tenses of the active voice except the perfect indicative.

(2) that these personal endings are added to the present stem **liberā-** except in the first person singular, where **ā** of the stem is lost.

(3) that the present stem is found by dropping **-re**, the last two letters of the present infinitive.

(4) that **a** is short before **-t** and **-nt** of the third person.

17. MODEL SENTENCE.

Belgae Galliam occupant. — *The Belgians seize Gaul.*

Observe: —

(1) that **occupō** is a transitive verb.

(2) that **Galliam**, its direct object, is put in the accusative case.

18. **RULE.** — *The direct object of a transitive verb is put in the accusative case.*

19. VOCABULARY.

appellō, appellāre, *call, name.*

occupō, occupāre, *seize.*

importō, importāre, *import, carry in.*

superō, superāre, *conquer, overcome.*

incitō, incitāre, *incite, arouse.*

vāstō, vāstāre, *lay waste, ravage.*

liberō, liberāre, *liberate, free.*

20. WRITTEN WORK.

(1) Write the present stem of each verb in the above vocabulary.

(2) Write the present indicative active of **appellō** and **occupō** with meaning of each form.

EXERCISES.

I. (1) Appellāmus; occupātis; vāstant; incitās; superant. (2) Belgae superant. (3) Celtae Belgās superant. (4) Prōvinciam vāstātis. (5) Fossam occupāmus. (6) Galliam superās. (7) Nostra fuga Belgās incitat. (8) Belgae prōvinciam vāstant. (9) Celtae māgnam fossam occupant. (10) Hīspānia est māgna prōvincia.

II. (1) You (sing.) call; they are liberating¹; we lay waste; you² are importing; he does arouse Spain. (2) The Belgians are arousing Gaul. (3) The flight arouses the Celts. (4) We are conquering the provinces. (5) You seize the nearest trenches. (6) The Celts are laying waste our provinces.

¹The Latin verb *liberō* may mean *I am liberating* or *I do liberate* as well as *I liberate*. In other words, the progressive and emphatic forms of the English verb may be translated into Latin by the same word as is used to express the ordinary declarative sense.

²Unless otherwise directed, the pronoun *you* should be regarded as plural.

LESSON IV.

PRESENT INDICATIVE PASSIVE OF THE FIRST CONJUGATION.
— THE GENITIVE CASE.

THE GREAT HALL OF A ROMAN HOUSE.

CAESAR'S WIFE. When Caesar was about twenty years old, he lost his political office and all his property and had to flee from Rome for his life, because he firmly refused to obey the orders of a tyrannical ruler and give up his girl-wife Cornelia. Such loyalty to those he loved characterized Caesar throughout his life.

22. When the subject of a verb does something, we say the verb is in the **active voice**, as *he liberates, he is liberating, or he does liberate*. When something is done to the subject, we say the verb is in the **passive voice**, as *he is liberated, or he is being liberated*.

23.

PARADIGM.

PRESENT INDICATIVE PASSIVE OF THE VERB **Liberō**.

	SINGULAR.	PERSONAL ENDINGS
1st Person	liberor, I am liberated	-r
2d Person	liberāris (liberāre), you are liberated	-ris (or -re)
3d Person	liberātur, he is liberated	-tur
	PLURAL.	PERSONAL ENDINGS.
1st Person	liberāmur, we are liberated	-mur
2d Person	liberāminī, you are liberated	-minī
3d Person	liberantur, they are liberated	-ntur

Observe: —

(1) that the passive forms differ from the corresponding active forms only in the personal endings.

(2) that as in the active voice, the personal endings, which take the place of personal pronouns, are added to the present stem **liberā-** except in the first singular, where **ā** of the stem is lost.

(3) that the **a** is short only before **-nt** of the plural.

24.

MODEL SENTENCES.

(1) *Belgae Galliam prōvinciam appellānt.* — *The Belgians call Gaul a province.* (2) *Gallia prōvincia appellātur.* — *Gaul is called a province.* (3) *Fossa Belgārum est lāta.* — *The Belgians' trench is wide.*

Observe: —

(1) that in sentence 1 **prōvinciam**, a predicate noun, describes **Galliam**, means the same thing, and agrees with it in the accusative. This construction is known as the **predicate accusative**.

(2) that in sentence 2 **prōvincia**, a predicate noun, describes

Gallia, means the same thing, and agrees with it in the nominative. This construction is known as the **predicate nominative**.

(3) that in sentence 1 the verb is in the active voice, because the subject, **Belgae**, does something, while in sentence 2 the verb is in the passive voice, because something is done to the subject.

(4) that in sentence 3 **Belgārum** is used to limit or define **fossa** and does not mean the same person or thing, and is put in the genitive.

25. RULES. — 1. *A noun used to describe another noun, and denoting the same person or thing, agrees with it in case.*

2. *A noun used to define or limit another noun, and not meaning the same person or thing, is put in the genitive.*

26.**VOCABULARY.**

accūsō, accusāre, *accuse, blame.*

lāta, *wide, broad.*

armō, armāre, *arm, equip.*

longa, *long.*

commeō, commeāre, *go often, resort.*

27.**WRITTEN WORK.**

Write out with meanings the present indicative, active and passive, of **accūsō** and **armō**, underlining the personal endings.

28.**EXERCISES.**

(Note carefully the voice as well as person and number of all verb forms.)

I. (1) **Accūsās**; **accūsāris**; **accūsāmus**; **accūsāmur**; **superātis**; **superāminī**; **appellātur**. (2) **Belgae superantur**. (3) **Prōvincia Celtārum est māgna**. (4) **Celtae accūsantur**. (5) **Fossae Belgārum occupantur**. (6) **Reliquae prōvinciae vāstantur**. (7) **Proxima prōvincia Hispānia appellātur**. (8) **Belgae nostrā linguā Celtae appellantur**. (9) **Belgās nostrā linguā Celtās appellāmus**.

II. (1) We arm, we are armed; you call, you are called (sing.); he conquers, he is conquered; you are accused; they are liberated. (2) The Belgians are liberated. (3) The province is aroused. (4) Spain is called a large province. (5) We call Spain a large province.

LESSON V.

SECOND DECLENSION OF NOUNS.—THE DATIVE CASE

THE PIRATES.—At one time Caesar went on a sea voyage and was captured by some pirates who were cruising about in an old trireme, or war galley. He took his capture very coolly and charmed the rascals by wit and good humor till his friends could collect money for his ransom. As soon as he was free, he made good a promise, which his captors had taken as a joke; and getting together some ships, he captured and hanged the whole band.

SECTION OF A TRIREME. NOTE HOW THE GALLEY SLAVES ROWED IN THREE ROWS.

29. Nouns of the Second Declension end in **-us, -er, -ir, -um**. Those ending in **-um** are neuter; most others are masculine.

30.

PARADIGM.

Gallus, a Gaul; BASE, Gall-.

	SINGULAR.	CASE ENDINGS.
<i>Nominative</i>	Gallus, the Gaul (as subject)	-us
<i>Genitive</i>	Gallī, of the Gaul	-ī
<i>Dative</i>	Gallō, to or for the Gaul	-ō
<i>Accusative</i>	Gallum, the Gaul (as object)	-um
<i>Ablative</i>	Gallō, by, from, in, or with the Gaul	-ō
PLURAL.		
<i>Nominative</i>	Gallī, the Gauls (as subject)	-ī
<i>Genitive</i>	Gallōrum, of the Gauls	-ōrum
<i>Dative</i>	Gallīs, to or for the Gauls	-īs
<i>Accusative</i>	Gallōs, the Gauls (as object)	-ōs
<i>Ablative</i>	Gallīs, by, from, in, or with the Gauls	-īs

Observe: —

(1) that the ending of the genitive singular is **-ī**, which is the distinguishing ending of this declension.

(2) that by dropping this ending from the genitive singular, we obtain the base, **Gall-**.

The vocative singular of Second Declension nouns in **-us** ends in **-e**, *i.e.* **Galle**, *O Gaul*. In all other nouns of all declensions, the vocative of each number is the same as the nominative of the same number.

31. Masculine adjectives ending in **-us** are declined exactly like **Gallus**. All the adjectives already studied, except **nostra**, have this ending in the masculine, as **māgnus Gallus**, *the large Gaul*.

32.

MODEL SENTENCES.

(1) **Carrōs Gallīs damus.** — *We give carts to the Gauls.* (2) **Gallī ad Hispāniam commeant.** — *Gauls go-often to Spain.*

Observe: —

(1) that in sentence 1 **carrōs**, the direct object, is in the accusative, and that **Gallīs**, the indirect object, is in the dative.

(2) that in sentence 2 the prepositional phrase, *to Spain*, is used with a verb denoting motion or direction and is expressed in Latin by **ad** with the accusative. On the other hand, in sentence 1 the phrase, *to the Gauls*, is used with the verb *give*, conveying no idea of motion or direction, and is put in the dative.

33. RULE. — *The indirect object of a transitive verb is put in the dative case.*

34.

VOCABULARY.

amicus, **-ī**, **m.**, *friend*.

Aquitānus, **-ī**, **m.**, *Aquitanian*, a native of the southwestern part of France.

carrus, **-ī**, **m.**, *cart*.

dō, *dare*, *give*.

ad, *prep.*, *to or towards*, governing *acc.*

Gallus, **-ī**, **m.**, *Gaul*, a native of Gallia.

Germānus, **-ī**, **m.**, *German*.

numerus, **-ī**, **m.**, *number*.

Ōceanus, **-ī**, **m.**, *ocean*.

vīcus, **-ī**, **m.**, *village*.

35.

WRITTEN WORK.

(1) Decline in full with meanings *bonus amicus* and *proximus numerus*, including the vocative.

(2) Conjugate with meanings in the present indicative, active and passive, the verb *dō*.¹

36.

EXERCISES.

I. (1) *Belgās Gallōs appellant; Belgae Gallī appellantur.*
 (2) *Proximī vicī sunt in prōvinciā.* (3) *Ad prōvinciam commeāmus.* (4) *Carrōs Gallīs datis.* (5) *Aquitānī ad proximum Oceanum commeant.* (6) *Gallī proximōs amīcōs armant.*
 (7) *Reliquī vicī Gallīs dantur.* (8) *Germānī māgnōs vicōs Gallīs dant.* (9) *Germānī ad māgnōs vicōs Gallōrum commeant.*
 (10) *Nostrā linguā Aquitānī Gallī appellantur.*

II. (1) The villages are large. (2) They ravage the large villages. (3) We give the villages to the Gauls. (4) The Gauls often-go-to the villages of the Germans. (5) The Gauls give the trenches to the Germans. (6) We import the rest-of-the carts to our provinces.

¹ Note that a of the stem of the verb *dō* is short, but is lengthened in the 2d singular. So we have *dō, dās, dat, damus, datis, dant*, in the present indicative active.

PRESENT INDICATIVE ACTIVE AND PASSIVE OF THE SECOND CONJUGATION.

ROMAN CONSUL WITH IVORY SCEPTRE. BEHIND HIM STANDS ONE OF HIS TWELVE ATTENDANTS OR LICTORES WITH THE BUNDLE OF RODS OR FASCES OVER HIS LEFT SHOULDER.

POLITICAL HONORS. When Caesar was only forty-one years old, he had held the highest offices in the Roman government, ending with the consulship. Had he not been a very great man, he would have been satisfied with these honors, and we would then have heard not even his name. However, Caesar realized that great renown in his age could come only through a brilliant military career, and so he scorned an appointment as governor of a rich and tranquil province, where he might have become very wealthy but not at all famous.

37. The present infinitive of the Second Conjugation ends in *-ēre*, therefore the characteristic vowel (the vowel before *-re* of the present infinitive) is long *ē*.

3. movent, they move	-nt	3. moventur, they are moved	-ntur

Observe : —

(1) that the personal endings, both active and passive, are exactly the same as those of the First Conjugation verb *liberō*, and are added to the present stem *movē-* in the same manner.

(2) that this stem is found by dropping *-re* of the present infinitive.

(3) that *ē* of the stem is not lost before *-ō* of the first person, but is shortened, as *moveō*.

(4) that *e* is short in the same persons and numbers as *a* in *liberō*; § 16 (4), § 23 (3).

(5) that the active may also be translated *I am moving, you are moving, etc.*, and the passive, *I am being moved, etc.*

Observe : —

(1) that in sentence 1 *amicī*, an appositive noun, describes *Gallī*, denotes the same persons, and agrees with it in case according to rule in § 25-1.

(2) that in sentence 2 the same is true of *prōvincia*, denoting the same thing as *Hispānia*.

LESSON VII.

NEUTER NOUNS OF THE SECOND DECLENSION.—ADJECTIVES
OF THE FIRST AND SECOND DECLENSIONS.

CAESAR IN GAUL. As already stated, Caesar's determination to carve out for himself a great career led him to accept the governorship of Gaul, where by eight years of the hardest sort of campaigning, he greatly extended the boundaries of Gaul and proved himself not only a very clever politician, but also a peerless military captain. As the law did not allow a general to enter Rome while commanding an army, Caesar, during all this time, did not visit that city and was deprived of all the social pleasures and exciting open-air spectacles that made a Roman's life worth living.

<i>Genitive</i>	oppidī	-ī	oppidōrum	-ōrum
<i>Dative</i>	oppidō	-ō	oppidīs	-īs
<i>Accusative</i>	oppidum	-um	oppida	-a
<i>Ablative</i>	oppidō	-ō	oppidīs	-īs

Observe:—

(1) that the ending **-um** is the ending of all neuter nouns of the Second Declension according to the gender rule of § 29.

(2) that the nominative and accusative plural end in short **-a**, and that the accusative singular has the same ending as the nominative singular. This is true of neuter nouns of all declensions.

(3) that all other case endings are the same as those of masculine nouns of the Second Declension, § 30.

Neuter adjectives of the Second Declension are declined exactly like neuter nouns of the same declension. Observe the combination **māgnum oppidum**, a great town; bases **māgn- oppid-**.

43. All the adjectives given in the preceding lessons belong to the First and Second Declensions; the masculine and neuter adjectives belonging to the Second and the feminine to the First. These forms are summarized in the paradigm below.

(2) that the adjective **reliquōs** is masculine plural accusative to agree with **Belgās** in G. N. C.

(3) that the adjective **proxima** is neuter plural nominative to agree with **oppida** in G. N. C.

(4) that all adjectives in these sentences are attributive except **dīvīsa**. Explain its agreement, § 10 (2).

LESSON VIII.

THIRD DECLENSION OF NOUNS: CONSONANT STEMS.

CAESAR, DICTATOR.

Controlled by Caesar's enemies, the Roman senate not only refused him a hard-earned triumphal celebration, but voted to deprive him of the office in which he had so well served his country. With his loyal army of Gallic veterans, Caesar marched to Rome, where he was elected dictator. No massacres marred Caesar's triumph, which resulted in the best government Rome ever had. His plans for the happiness of his country were cut off by his assassination at the hands of men who owed to their noble victim their honors and lives.

<i>Abl.</i> lēgibus	virtūtibus	mercātōribus	flūminibus	-ibus	-ibus

Observe: —

(1) that the genitive singular of all these nouns ends in *-is*, the distinguishing ending of this declension.

(2) that the base (in nouns of this class the same as the stem) is found by dropping this ending *-is* from the genitive singular.

(3) that as the nominative singular is often unlike the stem, it is necessary in nouns of this declension to memorize the genitive singular as well as the nominative singular.

(4) that the nominative and accusative plural of the neuter noun *flūmen* ends in *-a*, while the accusative singular is the same as the nominative singular like neuter nouns of the Second Declension. Compare *oppidum*, § 42.

(4) Many carts are imported to the large villages. (5) The bravery of the consuls keeps the Germans away (from) the nearest towns.

LESSON IX.

PRESENT INDICATIVE, ACTIVE AND PASSIVE, OF THE THIRD CONJUGATION.

A BIT OF SWISS SCENERY.

THE ANCIENT SWISS. Caesar's first campaign was against the Swiss, whom the Romans called *Helvētii*. We all know the sort of country Switzerland is — three-fourths of its surface mountains and glaciers, not one acre in six fit for ploughing and planting. Small wonder that these brave Swiss determined to take away from their weaker neighbors, the Gauls, the green and fertile fields of "the pleasant land of France."

54. The present infinitive of the Third Conjugation ends in *-ere*; therefore the characteristic vowel (vowel before *-re* of the present infinitive) is short *e*.

The verbs studied may be grouped as follows:—

CONJ.	PRES. INDIC.	PRES. INFIN.	PRES. STEM.	CHAR. VOWEL.
I.	liberō	liberāre	liberā	ā
II.	moveō	movēre	movē	ē
III.	dīvidō	dīvidere	dīvide	e (variable)

55. PARADIGMS.

PRESENT INDICATIVE OF THE VERB *Dīvidō*.

PRIN. PARTS: *dīvidō, dīvidere.*

STEM: *dīvide-*.

ACTIVE.		PASSIVE.	
SINGULAR.	ENDINGS.		ENDINGS.
1. <i>dīvidō</i> , I divide.	-ō	1. <i>dīvidor</i> , I am divided.	-r
2. <i>dīvidis</i> , you divide.	-s	2. <i>dīvideris (re)</i> , you are divided.	-ris (-re)
3. <i>dīvidit</i> , he divides.	-t	3. <i>dīviditur</i> , he is divided.	-tur
PLURAL.			
1. <i>dīvidimus</i> , we divide.	-mus	1. <i>dīvidimur</i> , we are divided.	-mur
2. <i>dīviditis</i> , you divide.	-tis	2. <i>dīvidimini</i> , you are divided.	-mini
3. <i>dīvidunt</i> , they divide.	-nt	3. <i>dīviduntur</i> , they are divided.	-ntur

Observe:—

(1) that the personal endings, both active and passive, are the same as in the First and Second Conjugations.

(2) that the short *e* of the stem appears only in the second singular passive.

(3) that in the first singular, active and passive, the characteristic vowel of the stem is lost before *-ō* and *-or* as in the First Conjugation.

(4) that in other forms it becomes *i* or *u*.

56. The adjective **noster, nostra, nostrum**, *our*, differs from other adjectives of the First and Second Declensions only in the nominative singular masculine. It accordingly has as genitive singular forms **nostrī, nostrae, nostrī**, having as its base **nostr-**.

57.

VOCABULARY.

contendō, contendere, *contend, fight, hasten.*

LESSON X.

THIRD DECLENSION *I*-STEMS, NOUNS AND ADJECTIVES.

A GREAT EMIGRATION. In search of other and better homes, the Swiss started westward, 368,000 strong, driving before them their cattle and carrying with them their wives and children loaded in big wagons, which must have looked something like the "prairie schooners" once to be seen on our Western plains. The story of this great emigration and of the plucky fight put up by these ancient Swiss in their effort to escape from the rough, icebound fastnesses of Switzerland, we shall be prepared to begin in Lesson XI.

60. The stems¹ of the second class of the Third Declension nouns end in *-i*. Such nouns have (1) nominatives ending in *-is* and *-es*, as *finis*, *end*, and no more syllables in the genitive than in the nominative; (2) nominatives ending in *-ns* and *-rs*, as *cliēns*, *dependent*; (3) neuter nominatives ending in *-e*, *-al*, and *-ar*, as *vectigal*, *tax*; (4) nominatives that are monosyllables ending in an *-s* or *-x* preceded by a consonant, as *pars*, *part*.

<i>Ablative</i>	<i>partibus</i>	<i>finibus</i>	<i>-ibus</i>

¹ See footnote, page 20.

Observe:—

(1) that, unlike consonant stems, nouns of this second class do not have the base and stem the same.

(2) that the genitive plural ends in **-ium** and accusative plural in **-is** as well as in **-ēs**.

(3) that the ablative singular sometimes ends in **-ī**.

61. Most adjectives of the Third Declension have the masculine and feminine alike, but have distinct forms in the neuter nominative and accusative, as may be observed in the paradigms below. Such adjectives are known as Adjectives of Two Terminations, and have **ī**-stems.

PARADIGM.

(b) Index the Latin nouns thus obtained in seven vertical columns as follows, indicating the stem of the Third Declension nouns by *c* or *i* (see § 49) above the number 3:—

RAPID ORAL DRILL.

IV. Make any intelligible combination of Latin adjectives obtained in the second list with Latin nouns in the first list, taking care to make a proper G.N.C. agreement and to use the same noun but once. If time permits, this drill may be profitably extended by giving the genitive singular and the nominative plural of each of these combinations.

V. Translate into Latin, using appropriate prepositions: away from the town, out of the town, down from the town, in the town, to the town, into the town; among the Celts, with the Celts.

VI. Give short original English sentences to illustrate each of the following constructions: predicate noun, predicate adjective, direct object, indirect object, genitive case, appositive (1) of subject, (2) of direct object, (3) of indirect object.

MEMORY WORK.

VII. Review all verb paradigms by giving the corresponding active and passive together, as *liberō, liberor, liberās, liberāris*.

VIII. Review the gender rules of the First and Second Declensions.

Observe : —

(1) that in sentence 1 **Hī** is used as a demonstrative pronoun and is the subject of **prohibent**.

(2) that in sentence 2 **haec** is used as a demonstrative adjective, agreeing in G. N. C. with **flūmina** according to the rule already given: adjectives and participles agree with their nouns in G. N. C.

(3) that the verbs in these sentences denote separation, and that **oppidō** and **prōvinciā**, the things from which there is separation, are put in the ablative, the latter with and the former without a preposition.

68. RULE. — *Words signifying separation or privation are followed by the ablative with or without the prepositions **ab**, **dē**, or **ex**.*

73. Like the demonstrative *hīc*, *is* may be used both as a demonstrative *adjective* and as a demonstrative *pronoun*, meaning *this* or *that* in the singular, and *these* or *those* in the plural. As the Latin language has no third personal pronoun, *is* supplies this want, meaning *he*, *she*, *it*, or *they*, according to its form.

 (3) that in sentence 3 **eam** is used as a personal pronoun and is the direct object of the verb **liberat**.
 (4) that in sentences 1 and 2 the nouns **Belgārum** and **Gallōrum** are in the genitive case and denote the persons to whom **oppida** and **finēs** belong.

(3) Germānī, quibuscum¹ Belgae bellum gerunt, sunt fortēs. — *The Germans, with whom the Belgians carry on war, are brave.*

(4) Is quī est cōsul accūsātur. — *He (i.e. any one) who is consul is blamed.*

Observe:—

(1) that in each sentence the relative pronoun is in the same gender and number as its antecedent.

(3) that in sentence 4 *Is*, the antecedent of the relative pronoun, does not refer to any particular person, but means *the man, he, or one*, a usage of very common occurrence in Latin.

(1) that these nouns differ from the nouns of the Second Declension formerly declined only in the genitive singular, where **ī** is usually contracted to a single **i**.

(2) that the accent of this form is on the same syllable as in the nominative, cf. **cōnsi'lī** and **impe'rī** in the vocabulary § 90.

88

(1) that in these sentences **mercātōribus** and **Germānīs** are ablatives governed by the preposition **cum** and denote the persons in company with whom the action of the verb takes place.

(2) that this ablative, known as the Ablative of Accompaniment, answers the question "With whom?"

103. The perfect in Latin is the past time tense of greatest importance and of most frequent occurrence.

PARADIGM.

PERFECT INDICATIVE OF THE VERB *Sum*.PRINCIPAL PARTS: *sum, esse, fuī*.PERFECT STEM: *fu-*.

SINGULAR.

1. *fuī*, I was, I have been.

3. *fuērunt* (or *fuēre*), they were, they have been.

- imus
-istis
-ērunt (or -ēre).

Observe:—

(1) that the perfect stem *fu-*, to which the personal endings are attached, is found by striking off the ending *-ī* from the third principal part.

(2) that the perfect tense has a different set of personal endings. These personal endings are the same for the perfect indicative tenses of all conjugations in the active voice.

(3) that the perfect tense has two meanings, corresponding to the English past and to the present perfect respectively.

104. As in English, adjectives in Latin have three degrees of comparison, — positive, comparative, and superlative, — and are regularly compared as follows :

POSITIVE.			COMPARATIVE.			SUPERLATIVE.		
M.	F.	N.	M.	F.	N.	M.	F.	N.
fortis,	-e	(base fort-);	fortior,	-ius;	fortissimus,	-a,	-um	
	<i>brave</i>		<i>braver</i>		<i>bravest</i>	or	<i>very brave</i>	
M.	F.	N.	M.	F.	N.	M.	F.	N.
longus,	-a,	-um,	(base long-);	longior,	-ius;	longissimus,	-a,	-um
	<i>long</i>		<i>longer</i>		<i>longest</i>	or	<i>very long</i>	

Observe : —

(1) that the comparative is formed by adding to the base of the positive **-ior** for the masculine and feminine, and **-ius** for the neuter.

(2) that the superlative is formed by adding to the base of the positive **-issimus, -a, -um**.

105. The masculine and feminine of comparatives are declined exactly like the noun **mercātor** in § 50, while the neuter conforms to the principles governing the declension of neuter nouns § 42, (2).

111. *The Belgians.*

Belgae ab extrēmīs Galliae finibus oriuntur; pertinent ad inferiōrem partem flūminis Rhēnī; spectant in septentriōnem et orientem sōlem.

112. The principal parts of a Latin verb consist of: (1) pres. ind. act. 1st sing. (2) pres. inf. act. (3) perf. ind. act. 1st sing. (4) perf. pass. participle.

The principal parts of a verb must be thoroughly memorized, because from them are formed all other parts of the verb. The Latin verb has three stems found in the last three principal parts: the present stem, the perfect stem, and the participial stem. The method of finding these stems from the principal parts is indicated in the following table:

PRINCIPAL PARTS.

CONJ.	PRES. IND. ACT.	PRES. INF. ACT.	PERF. IND. ACT.	PERF. PASS. PART.

	PASSIVE.		
occupā- } monē- } prohibē }	-bā ^u -	{ -r -ris -tur	{ -mur -minī -ntur

Observe: —

(1) that the imperfect tense of these conjugations is formed by adding to the present stem the sign of the imperfect tense, **-bā**, and the personal endings, both active and passive.

(2) that the tense sign, **-bā**, naturally long is shortened before final **-m**, **-r**, **-t**, and before **-nt**.

(1) that in sentence 1 the ablative **virtūte** expresses the cause or reason why they are called noble.

(2) That in sentence 2 the phrase **cupiditatē rēgnī** expresses the reason why he did this. This ablative is called the Ablative of Cause and answers the question "Why?"

137. RULE. — *Cause is expressed by the ablative (usually without a preposition).*

141.

DEVELOPMENT EXERCISE.

Orgetorix fuit nōbilis et dives. Apud Helvētiōs fuit longē nōbilissimus et dītissimus. Cum (when) Marcus Messāla et Marcus Pīsō erant cōsulēs, Orgetorix cupiditāte rēgnī inducēbātur. Marcō Messālā et Marcō Pīsōne cōsulibus,¹ inductus² cupiditāte rēgnī, Orgetorix coniūrātiōnem nōbilitātis fēcit. Cīvitātī Helvētiōrum persuāsit ut (that) dē suis finibus exīrent (they should emigrate). Helvētiīs persuāsit ut cum omnibus cōpiīs exīrent.

¹ Marcō Messālā . . . cōsulibus, *M. Messāla*, etc., being consuls, a construction known as the ablative absolute, best translated by the cum clause in the previous sentence.

² inductus, a perf. pass. participle. The perfect passive participle, the fourth principal part of a transitive verb, is declined exactly like the adjective *lātus*, -a, -um, agreeing in G. N. C. with the noun or pronoun to which it belongs.

SECOND REVIEW.

I. List in a column and index as taught in the First Review the Latin nouns from which the following English words are wholly or partly derived: copious, counsel, flume, imperial, initial, mountainous, solar. Add to this list in the index the following: cīvitās, proelium, tēlum.

II. List in a column and compare as in § 104 the Latin adjectives from which the following English words are derived: fortitude, latitude, longitude, nobility.

III. List in a column the Latin verbs from which the following English nouns are wholly or partly derived and give the conjugation, principal parts, and meaning of each, distinguishing as in § 112 the various stems of each: absence, accusation, appellation, armament, capture, content, contention, (con)tingency, * (de)vastation,

*Only the first two principal parts are required of verbs found from nouns marked with an asterisk.

duct, (e)jection, fact, habit, incitement, inducement, (in)spec-
tion, obtaining, occupation, persuasion, prohibition, (in)superable,
verge.* Add to this list the verb *gerō*.

IV. List the following English adverbs in a column, placing
opposite each in a second column their Latin equivalents: almost,
continually, even, far, least, not, often.

V. Decline consecutively the list of ten nouns formed in I., by
giving the nominative singular of the first noun, the genitive
singular of the second, etc., the nominative plural of the sixth,
the genitive plural of the seventh, etc., and finally the ablative
plural of the tenth noun, thus giving one form of each noun, and
place the demonstrative *hic* in G. N. C. agreement with each form. †
In a second column decline consecutively the same list, starting
with the nominative singular of the fourth and ending with the ab-
lative plural of the third, placing the demonstrative *is* in G. N. C.
agreement with each form. Continue the same exercise, starting
with the sixth noun and placing the relative *qui* in G. N. C. agree-
ment with each form.

VI. Conjugate in full in the active voice the present indicative
of *iaciō*, imperfect of *habeō*, future of *absum*, perfect of *persuādeō*,
pluperfect of *faciō*, future perfect of *indūcō*. In the passive voice
present indicative of *obtineō*, imperfect of *obtineō*.

* Only two principal parts are required.

<i>Ablative</i>	<i>diē</i>	<i>diēbus</i>	<i>rē</i>	<i>rēbus</i>	<i>-ē</i>	<i>-ēbus</i>

Observe:—

That in *diēs* *e* is long except in the accusative singular, although according to the general law of quantity one would expect to find a short vowel before another vowel.

Diēs and **rēs** are the only nouns of this declension which are fully declined in the plural.

182. **Suī** is a reflexive pronoun, reflecting back to the subject for its meaning, *of himself, herself, itself, themselves*. Memorize its declension in the App., § 15. It will be found to have no nominative. Why?

183. **Ipse, -a, -um** is an intensive pronoun, ordinarily an appositive, *himself, herself, itself*. Memorize its declension in the App., § 16.

184.

MODEL SENTENCES.

(1) *Sē amīcōs Belgārum appellant. — They call themselves friends of the Belgians.* (2) *Helvētīi ipsī eōs suīs fīnibus prohibent. — The Helvetians themselves keep them away from their (the Helvetians') territories.* (3) *In eōrum fīnibus bellum gerunt. — They wage war in the territories of these (i.e. their enemies).* (4) *Cōpiās sēcum dūxit. — He led his forces with him.* (5) *Suās cōpiās cum eō mīsērunt. — They sent their forces with him.*

Observe: —

(1) that in sentence 1 *themselves* is a reflexive pronoun referring to the subject of the verb and is translated by **sē**, while in sentence 2 *themselves* is in apposition with *Helvetians*, intensifies its meaning, and is translated by **ipsī**.

(2) that in sentence 4 *him* refers to the subject *he* and is translated by **sē**, while in sentence 5 *him* does not refer to the subject and is translated by **eō**, the ablative of **is**.

(3) that in sentence 4 the preposition **cum** becomes enclitic with **sē**.

(4) that in sentence 2 *their* denotes the same person as the subject and is translated by the possessive adjective **suus, -a, -um**, while in sentence 3 *their* does not refer to the subject and is translated by **eōrum**, the genitive plural of **is, ea, id**.

(5) that in sentence 4 the possessive is omitted because not required for clearness or emphasis.

SUMMARY.

A third personal pronoun is translated by the reflexive when referring to the subject ; otherwise by a demonstrative. Similarly, possession in the third person is translated by **suus, -a, -um**, when referring to the subject, otherwise by the genitive, singular or plural, of a demonstrative. When merely intensive and not-reflexive, the compound personal pronouns, *himself*, etc. are translated by **ipse, -a, -um**.

¹ Masculine plural accusative. Accusative because subject of the infinitive **habĕre**. Why masculine plural?

(6) Orgetorix himself arouses the Gauls. (7) They will complete these things for themselves. (8) They will march with him into his territories. (9) He will give his territories to them.

¹ With the accusative and infinitive dūcō means, *consider*.

THIRD REVIEW.

I. List in a column with meanings the Latin nouns from which the following English words are wholly or partly derived: authoritative, locality, itinerary, lake, pacify, agrarian, real, human, pace, multitudinous, natural, million, latitude, legation, annual. Add to this list the Latin nouns for friendship, grain, departure.

II. List in a column and index as in the First Review the Latin adjectives meaning: easy, neighboring, great, desirous, comparing the last named.

III. List in a column and give the principal parts and meanings of each Latin verb from which the following English words are wholly or partly derived: vagrant, potent, patent, adduce, constitution, confirmation, confection, delegation. Add to this list the Latin verbs meaning: prepare, alarm, get possession, undertake.

IV. Write in a column the following English words, placing opposite each its Latin equivalent: from all sides, moreover, than, enough.

V. Decline consecutively as in the Second Review the first ten nouns in I, starting (*a*) with the third noun and putting **tōtus** in G. N. C. agreement with each form; (*b*) with the sixth noun, putting **alius** in agreement with each form; (*c*) with the eighth, putting **alter** in agreement with each form. Index as in the previous review lessons the remaining nouns in I, noting that one of these nouns varies in the meaning of the plural.

VI. Conjugate in full the imperfect and future indicative, active and passive, of **permovēō**, **dēligō**, and **suscipiō**, marking all long vowels with care.

VII. Review the translation of the text at the head of Lessons XXI–XXV, inclusive. Select in this text all examples of the Genitive of the Whole and of the Accusative of Extent, illustrating these constructions by short original Latin sentences translated into English.

RULES FOR THE GENDER OF THIRD DECLENSION NOUNS.

VIII. (1) Most nouns in **-ēs**, which increase (have more syllables) in the genitive, nouns in **-er**, **-or**, and **-ōs** are masculine.

(2) Most nouns in **-ēs**, which do not increase in the genitive, nouns in **-ō**, **-ās**, **-is**, **-ūs** (genitive **-ūtis** or **-ūdis**), **-x**, and in **-s** preceded by a consonant are feminine.

(3) Nouns in **-c**, **-i**, **-t**, **-y**, **-l**, **-a**, **-n**, **-e**, **-ar**, **-ūs** (genitive **-oris** or **-eris**), are neuter.

Many exceptions to these rules will be found, but these are best learned from practice. Remember that, whatever their endings, nouns denoting males are masculine and those denoting females are feminine.

Apply these rules to the following third declension nouns, giving the gender only of each: **pater**, **tempus**, **ōrātiō**, **iūs**, **frāter**, **mōs**, **mors**, **reditiō**, **facultās**, **urbs**, **altitūdō**, **ratis**, **nox**, **servitūs**, **nōmen**, **animal**.

(2) that this participle, like an adjective, agrees in G. N. C. with the subject

LESSON XXIX.

THE SUBJUNCTIVE MOOD, PRESENT TENSE, ACTIVE AND PASSIVE. — THE DEMONSTRATIVE *ILLE*.

207. *Orgetorix wins the support of an ambitious Aeduan by making him his son-in-law.*

Itemque Dumnorīgī Aeduō, frātrī Dīviciācī, quī eō tempore prīncipātum in cīvitāte obtinēbat ac māximē plēbī acceptus erat, ut idem cōnārētur persuādet, eīque filiam suam in mātirimōnium dat.

208. The indicative mood states the action of the verb as a fact, while the subjunctive states the action of the verb as desired, doubtful or dependent for its truth upon a statement of fact either expressed or implied. No meanings are given for subjunctive forms because the meanings vary widely according to the degree of uncertainty expressed or implied.

209.

PARADIGMS.

PRESENT SUBJUNCTIVE, ACTIVE AND PASSIVE, OF THE VERB
Liberō, AND *Sum*.

ACTIVE.		PASSIVE.	
SINGULAR.	PLURAL.	SINGULAR.	PLURAL.
1. liberem	liberēmus.	1. liberer	liberēmur.
2. liberēs	liberētis.	2. liberēris or -re	liberēminī.
3. liberet	liberent.	3. liberētur	liberentur.
1. sim	sīmus.	(No Passive.)	
2. sīs	sītis.		
3. sit	sint.		

Observe:—

(1) that the active first personal ending is **-m** instead of **-ō**.

(2) that the vowel preceding the personal endings is long, except before **-nt** and **-r, -t** final.

These observations are true of all tenses of the subjunctive of whatever conjugation.

210. TABLE OF THE PRESENT SUBJUNCTIVE, ACTIVE AND PASSIVE, OF THREE CONJUGATIONS.

ACTIVE.		PASSIVE.	
libere-	} -m, -s, -t, -mus, -tis, -nt.	libere-	} -r, -ris or -re, -tur, -mur, -minī, -ntur.
movea-		movea-	
dīvida-		dīvida-	
capia-		capia-	

How does the present subjunctive of **dīvidam** and **capiam** differ from their future indicative?

The present subjunctive of any verb in the Latin language can be formed without difficulty by any student who will memorize the following five forms: **sim, liberem, moveam, dīvidam, capiam**.

211. Memorize the declension of the demonstrative **ille, illa, illud**, in the App., § 16. **Ille** (transl. *that* in sing., *those* in plu.) is contrasted as to use with **hic** (transl. *this* in sing., *these* in plu.). In general, **hic** is used to designate what is thought of as near in time, place, etc., to the speaker, while **ille** denotes what is remote. For this reason **hī**, the plural of **hic**, is used very frequently by Caesar to refer to his own soldiers, while **illī** is made to refer to the enemy. **Hic** often means *the latter*, and **ille**, *the former*.

212.

VOCABULARY.

cōnātum, -ī, n., *attempt*.

dubius, -a, -um, adj., *doubtful*.

ille, illa, illud, demonstrative adj. or pro., *that*.

proptereā, adv., *therefore, for that*

reason; regularly followed by conj., **quod**, with which it is translated by the single word *because*.

quīn, conj. (followed by subj., often trans. as ind.) *that, but that*.

conciliō, 1, *conciliate, win over*.

dō, dare, dedī, datus, *give*.

perficiō, -ficere, -fēcī, -fectus, *accomplish*.

214.

215.

DEVELOPMENT EXERCISE.

1. *Cōnāta perficere est perfacile factū.¹* 2. *Illīs probat cōnāta perficere esse perfacile factū¹: id erat perfacile factū¹ propterea quod suae cīvitātis imperium obtentūrus² esset (imp. subj. of sum: transl. as imp. ind.).* 3. *Nōn erat dubium quīn Helvētīī tōtīus Galliae plūrimum possent (were the most powerful).* 4. *Dixit nōn esse dubium quīn Helvētīī tōtīus Galliae plūrimum possent.* 5. *Suīs cōpiīs suōque exercitū illīs rēgna conciliātūrus³ erat.* 6. *Illīs rēgna sē conciliātūrum esse cōfirmat.*

- ¹ **factū**, what is known as the supine in **ū** of **faciō**, transl. as present infinitive.
² **obtentūrus**, future active participle of **obtineō**, transl. *going to get or obtain*.
³ **conciliātūrus**, future active participle of **conciliō**, transl. *going to win over*.

Note how in the above short sentences the even-numbered sentences express the same thought as those immediately preceding with the addition of an introductory word of saying or thinking, as **probat**, **dixit**, or **cōfirmat**. After such introductory words the main verbs of the thought, as **est** and **erat**, are changed into the infinitive, though best translated by the indicative in English. Point out how the same change has taken place in the development exercises of Lessons XXI, XXIV, and XXVI. A thought thus expressed is said to be in indirect discourse because it is indirectly stated.

LESSON XXX.

THE IMPERFECT SUBJUNCTIVE, ACTIVE AND PASSIVE.—
CLAUSES OF PURPOSE.

216. *Orgetorix explains to his confederates the grounds of his confidence.*

Perfacile factū esse illīs probat cōnāta perficere, proptereā quod ipse suae civitātis imperium obtentūrus esset: [dixit] nōn esse dubium quān tōtīus Galliae plūrimum Helvētīi possent; sē suīs cōpiīs suōque exercitū illīs rēgna conciliātūrum cōfirmat.

2. liberārēs	liberārētis.	2. liberārēris or -re	liberārēminī.
3. liberāret	liberārent.	3. liberārētur	liberārentur.

Observe :—

(1) that the imperfect subjunctive is formed by adding the personal endings, both active and passive, to the present active infinitive. This is true of all verbs of all conjugations.

(2) that the principle already stated in § 209 holds true regarding the length of the vowel preceding the personal endings.

(1) that the verbs in the subordinate clauses are all in the subjunctive mood.

(2) that these subordinate clauses express the purpose or will of the action of the principal clauses, **ut** affirmative and **nē** negative.

(3) also that when the main verb is in the present or future tenses, as in sentences 1 and 3, the subordinate verb is in the present subjunctive. On the other hand, when the main verb is

in a past time tense (*i.e.* imperfect, perfect, or pluperfect), the subordinate verb is in the imperfect subjunctive.

¹ Purpose cannot be expressed by the infinitive in Latin prose as is done in English.

² dant inter sē = *exchange* (literally, *give among themselves*).

Observe:—

(1) that the perfect and pluperfect active subjunctive are formed by adding to the perfect stem **liberāv-** the suffixes **-erim**, **-eris**, etc., and **-issem**, **-issēs**, etc., respectively. In what person does the perfect active subjunctive differ from the future perfect active indicative?

(2) that the perfect and pluperfect subjunctive passive differ from the corresponding tenses of the indicative only in the mood of the auxiliaries.

(3) All verbs in Latin form these tenses in precisely the same way, as may be seen by reference to the Appendix.

(2) that these subjunctives are translated by the indicative.

Note that the tenses of the subjunctive are determined by the same principles as in purpose clauses in § 219 (3).

(1) that **domus** is declined according to the Fourth Declension but also shows certain forms of the Second Declension.

(2) that in the ablative singular and the accusative plural these second declension forms occur more frequently than the alternative form, and should therefore be learned first.

Domus is feminine, though we should expect to find it masculine, whether regarded as a fourth or second declension noun.

LESSON XXXIII.

FOURTH CONJUGATION OF VERBS.—ABLATIVE OF PLACE IN WHICH.

241. *Orgetorix assembles a large number of supporters, who interrupt the trial and rescue him.*

Diē cōstitutā causae dictiōnis Orgetorix ad iūdicium omnem suam familiam, ad hominum milia decem, undique coēgit, et omnēs clientēs obaerātōsque suōs, quōrum māgnū numerum habēbat, eōdem condūxit; per eōs nē causam dīceret sē ēripuit.

PARADIGMS.

PRESENT INDICATIVE ACTIVE AND PASSIVE OF THE FOURTH CONJUGATION OF THE VERB **Impediō.**

PRIN. PARTS : **impediō, impedire, impedivī, impedītus.**

PRESENT STEM : **Impedi-**.

ACTIVE VOICE.

SINGULAR.

PLURAL.

| 1. impediō , I impede, am impeding. | impedimus , we impede, are impeding. |
| 2. impedis , you impede, etc. | impeditis , you impede, etc. |

Observe : —

That the present of this Fourth Conjugation verb is exactly the same as the present of **capiō**, the model verb of the Third Con-

jugation in *io*, except in the second singular passive and in the quantity of the characteristic vowel.

All other tenses, both indicative and subjunctive, are formed in precisely the same way as the same tenses of *capitō*.

243.

MODEL SENTENCES.

(2) *Exercitus est, the army is* } in oppidō, in the town.

domī, at home.
rūrī, in the country.

Observe: —

That Place in Which is expressed by the ablative with *in*, but names of towns, *domus* and *rūs*, omit the preposition and show a form known as the locative. This case in names of towns of the First and Second Declensions is the same as the genitive singular, in names of towns of the Third Declension is the same as the dative.

Domī, at home, and *rūrī*, in the country, are the only other locative forms in common use.

244. RULE. — Place In Which is expressed by the ablative case with the preposition *in*, but with names of towns, *domus*, and *rūs*, the preposition is omitted and the locative is used whenever such a form occurs.

LESSON XXXIV.

PARTICIPLES. — THE DATIVE WITH SPECIAL VERBS.

249. *The Swiss prepare to rearrest him. Orgetorix unexpectedly dies.*

Cum civitas, ob eam rem incitata, armis ius suum exsequi conaretur, multitudinemque hominum ex agris magistratus cogere, Orgetorix mortuus est; neque abest suspicio, ut Helveticum arbitrantur, quin ipse sibi mortem consciverit. [Cap. IV. Finis.]

250. The participle is a verbal adjective, often governing a case as a verb and always agreeing as an adjective in G. N. C. with its substantive. Participles are so much more frequently used in Latin than in English that a thorough knowledge of their forms and uses becomes of great importance. Before attempting to study the table given below, the student must thoroughly review the treatment of verb-stems in § 112.

251.

TABLE OF PARTICIPLES.

ACTIVE VOICE.

PASSIVE VOICE.

PRESENT TENSE.

liberans, liberating
 movens, moving
 dividens, dividing
 capiens, taking
 impediens, impeding

Latin has no present passive participle.

FUTURE TENSE.

liberaturus, -a, -um, going to liberate
 moturus, -a, -um
 divisurus, -a, -um
 capturus, -a, -um
 impediturus, -a, -um

liberandus, -a, -um, to be liberated
 movendus, -a, -um
 dividendus, -a, -um (commonly known
 capiendus, -a, -um as gerundives)
 impediendus, -a, -um

PERFECT TENSE.

Latin has no perfect active participle.	liberātus, -a, -um (having been) liberated
	mōtus, -a, -um
	divīsus, -a, -um
	captus, -a, -um
	impeditus, -a, -um

Observe: —

(1) that the present active and future passive (or gerundive) participles are formed by adding to the present stem **-ns** and **-ndus** respectively. The verbs in **io** form their present active and future passive participles in **-iēns** and **-iendus**.

(2) that the future active and perfect passive participles are formed on the participial stem. To this stem **-ūrus** is added to form the future active, while the perfect passive participle is simply the fourth principal part.

252. All present participles and adjectives ending in **-ns** present the peculiarities of **i**-stems. Memorize the declension of the present participle **liberāns** in the App., § 10.

253. MODEL SENTENCES.

(1) *Id eīs persuāsit.* — *He persuaded them (to do) this.* (2) *Dumnorīgī ut idem cōnārētur persuāsit.* — *He persuaded Dumnorix to attempt the same thing.* (3) *Gallī Germānis resistēbant.* — *Gauls resisted the Germans.*

Observe: —

That in the English sentences the words, *them*, *Dumnorix*, and *Germans* are the direct objects of their verbs, while the Latin equivalent is put in the dative case, becoming indirect objects though translated as direct objects. This construction is called the Dative with Special Verbs.

254. RULE. — *Many verbs signifying to favor, help, please, trust, and their contraries, also to believe, persuade, command, obey, serve, resist, envy, threaten, pardon, and spare, take the dative translated as direct object.*

255.

exeō, -īre, -īī, -itus, *go forth, emigrate.*

incendō, incendere, incendi, incēnsus, *set on fire.*

resistō, resistere, restitī, —, *withstand, resist.*

studeō, studēre, studuī, —, *be eager or zealous for, desire (with dative).*

258.

DEVELOPMENT EXERCISE.

Post eius mortem nihilō minus Helvētiī cōnantur¹ ē fīnibus suis exīre. Id quod cōstituerant facere cōnantur, ut ē fīnibus exeant.² Iam arbitrātī sunt sē ad eam rem parātōs esse. FOURTH REVIEW.

I. Write in a column, with meanings, the Latin nouns, from which the following English words are wholly or partly derived: filial, paternal, senatorial, popular, temporal, oration, diurnal, jury, ignite, mortal, amicable, fraternal, fidelity, clientage, armorial, magisterial, suspicious, moral, adding to this list the Latin word for *army*.

II. Decline consecutively the first ten of these nouns (*a*) starting with the first and putting the demonstrative *ille* in agreement with each form, (*b*) starting with the fifth and putting the demonstrative *idem* in agreement with each form. Index as directed in the First Review all other nouns in I.

III. Give the Latin adjectives from which the following English words are derived: multitude, firmness, potential. Compare the second and decline the last like *liberāns* in the App., § 10.

IV. Write in a column (giving principal parts and meanings) the Latin verbs from which the following English words are derived: data, probe, perfect, conciliate, (de)sperate, enunciate, cogent, conduce, sequence, adding to this list the Latin verbs meaning *to attempt* and *it is fitting*.

V. Write synopses as follows: in the active voice, *ēnūntiō* in the 3d singular, *perficiō* in the 1st plural, *cōgō* in the 3d plural; in the passive voice, *dō* in the 3d singular, *condūcō* in the 2d plural.

VI. Make a table giving in one column all the uses of the nominative you have studied; in the second, the genitive uses, etc., through the ablative. Review the rules of Purpose and Result.

VII. Translate text at the head of Lessons XXVI–XXXIV inclusive, pointing out all examples of the rules mentioned in VI.

LESSON XXXV.

THE USE OF PARTICIPLES IN THE ABLATIVE ABSOLUTE.

259. *The Swiss continue their preparations and burn their homes behind them.*

Post eius mortem nihilō minus Helvētīī id, quod cōstituerant, facere cōnantur, ut ē finibus suīs exeant. Ubi iam sē ad eam rem parātōs esse arbitrātī sunt, oppida sua omnia, numerō ad duodecim, vicōs ad quadringentōs, reliqua prīvāta aedificia incendunt.

260. In the sentence, *The teacher being absent, there was no school*, the word *teacher* is said to be nominative independent or absolute because the phrase in which it stands is independent of the rest of the sentence. What is known in English grammar as the nominative independent or absolute is represented in Latin by the Ablative Absolute. The literal translation of each model sentence below will be recognized as containing an example of the nominative independent.

261.

MODEL SENTENCES.

(1) Omnibus rēbus ad profectiōnem com- parātīs, diem dīcent.	}	(Literally, <i>everything having been prepared</i> , a trans- lation inadmissible in English), <i>After, if, since, or when everything has been pre- pared,</i>	}	<i>they will appoint a day.</i>
--	---	--	---	---

(2) Multis oppugnantis, oppidum non captum est. { (Literally, many attacking), Though many attacked it, } the town was not captured.

Observe: —

That in each of these sentences we find an independent phrase having a noun and a participle in agreement in the ablative; in the first a perfect participle to denote completed action at the time of the main verb, in the second a present participle because the action is going on at the time of the main verb.

Since the verb *sum* has no present participle, two substantives or a substantive and an adjective in agreement in the ablative may constitute an Ablative Absolute.

The following familiar example sufficiently illustrates this construction and its various translations: —

M. Messalā, M. Pisonē cōsulibus, Orgetorix coniūratiōnem fēcit.	}	(Literally, <i>Marcus Messala and Marcus Piso being consuls</i>), <i>When Marcus Messala and Marcus Piso were consuls,</i>	}	<i>Orgetorix formed a conspiracy.</i>
---	---	--	---	---------------------------------------

This ablative answers the questions, “When?” “Why?” “How?” “By what means?” “Under what circumstances?”

262. RULE. — *A noun or pronoun with a participle in agreement may be put in the ablative to define the time or circumstances of an action. This construction is called the ablative absolute.*

263.

VOCABULARY.

mēnsis, *mēnsis*, m., *month*.
reditiō, *reditiōnis*, f., *return*; *reditiō domum*, *return home*.
spēs, *spei*, f., *hope* (in plu. only nom. and acc.).
quisque, *quaeque*, *quidque*, indef. pro., *each one*.

cibārius, -a, -um, *of or pertaining to food*; *cibāria molita*, *ground food, flour*.
difficilis, -e, *difficult*.
quandō, interrog. adv., *when?*
praeter, prep. governing acc., *except, beyond*.

combūrō, combūrere, combussī, combūstus, *burn up.*

effērō, efferre, extulī, elātus, *carry or take away.*

iubeō, iubēre, iussī, iussus, *order.*

oppūgnō, 1, *attack.*

portō, 1, *carry.*

subeō, subire, subiī, subitus, *undergo*; gerundive, subeundus, -a, -um, *to-be-undergone.*

tollō, tollere, sustulī, sublātus, *take away, remove.*

264.

WRITTEN WORK.

(1) Combine **Orgetorīx**, in the Ablative Absolute, with the perfect passive and present active participles of **addūcō** and translate each combination in all possible ways, as suggested in the translations in § 261.

(2) Similarly combine and translate **cōnsul** and **superō**, **Belgae** and **liberō**.

(3) Decline **mēnsis** and **spēs**, noting that one of these nouns is defective in certain cases of the plural.

Observe :—

(1) that the perfect active infinitive is formed by adding *-isse* to the perfect stem, while the future active infinitive is simply the future active participle and *esse*.

(2) that the present passive infinitive is formed by changing the final *-e* of the present active infinitive to *-ī* except in the Third Conjugation, where the *-er* is syncopated (or cut out) after making the same change.

(3) that the perfect passive infinitive is simply the perfect passive participle and **esse**.

(4) that the future passive infinitive is formed by combining **irī** and what is called the supine of the verb, a form which always is the same as the neuter singular accusative of the perfect passive participle.

The verb **sum** having no passive voice has but three infinitive forms: present, **esse**, *to be*; perfect, **fuisse**, *to have been*; future, **futūrus, -a -um esse**, *to be going-to-be*.

DATIVE WITH ADJECTIVES.

275. *Their neighbors adopt the same plan and start out along with them.*

Persuādent Rauracīs et Tulingīs et Latobrigīs finitimīs, utī eōdem ūsī cōnsiliō, oppidīs suis vicīsque exustīs, ūnā cum iīs proficiscantur.

276. Memorize the declension of the numeral *duo*, *two*, App., § 9; also the conjugation of *possum*, *I am able*, App., § 26.

The verb *possum* is a compound of the verb *sum* and the adjective *potis*, *able*; base, *pot*-. — This combination undergoes certain euphonic changes when two consonants occur together.

LESSON XXXVIII.

THE INFINITIVE IN INDIRECT DISCOURSE.

283. *The Swiss form an alliance with the Boii.*

Persuādent Rauracīs et Tulingīs et Latobrigīs finitimīs, utī eōdem ūsī cōnsiliō oppidīs suīs vicīsque exustīs, ūnā cum iīs proficiscantur, Bōiōsque, quī trāns Rhēnum incoluerant et in agrum Nōricum trānsierant Nōrēiamque oppugnārant, receptōs ad sē sociōs sibi adsciscunt. [Cap. V. Fīnis.]

284. Direct Discourse gives the exact words of a speaker or writer; as, *Caesar is coming.* Indirect Discourse gives the words of a speaker or writer as reported by another or by the same person after a verb of knowing, telling, thinking, and perceiving; as, *he says that Caesar is coming.*

DIRECT DISCOURSE.

Belgae bellum gerunt. — *The Belgians are carrying on war.*

INDIRECT DISCOURSE.

Dicit Belgās bellum gerere. — *He says that the Belgians are carrying on war, or He says the Belgians are carrying on war, or (literally), He says the Belgians to be carrying on war.*

Observe: —

(1) that the indicative **gerit** in the Direct Discourse becomes the infinitive **gerere** in the Indirect Discourse.

(2) that the infinitive phrase is the direct object of **dicit** according to § 270 (1).

(3) that **Belgae**, the subject nominative in the Direct Discourse, becomes **Belgās**, the subject accusative of the infinitive in the Indirect Discourse.

285. *RULE.* — *Verbs and other expressions of knowing, telling, thinking, and perceiving are followed in indirect discourse by the infinitive with subject accusative.*

USES OF THE INFINITIVE TENSES IN INDIRECT DISCOURSE.

286. MODEL SENTENCES.

Dicit Belgās bellum gerere. — *He says that the Belgians are carrying on war.* Dixit Belgās bellum gerere. — *He said that the Belgians were carrying on war.*

Observe:—

That the present infinitive represents the action as being performed at the time of the verb on which it depends.

Dicit Belgās bellum gessisse. — *He says that the Belgians have carried on war.* Dixit Belgās bellum gessisse. — *He said that the Belgians had carried on war.*

Observe:—

That the perfect infinitive represents the action as already performed at the time of the verb on which it depends.

Dicit Belgās bellum gestūrōs esse. — *He says that the Belgians will carry on war.* Dixit Belgās bellum gestūrōs esse. — *He said that the Belgians would carry on war.*

Observe:—

That the future infinitive represents the action as going to be performed after the time of the verb on which it depends, and that the participle **gestūrōs** agrees in G. N. C. with **Belgās**, the subject of the infinitive.

In all these sentences the conjunction *that* introducing the subordinate clause in English has no equivalent in the Latin sentence.

SUMMARY.

The tenses of the infinitive *present, perfect, or future* represent the action as *being performed, already performed, or going to be performed* relative to the time of the verb on which it depends.

287.

VOCABULARY.

perpauci, -ae, -a, *very few*.singuli, -ae, -a (distributive numeral),

288.

WRITTEN WORK.

(1) With the present 3d plural active of *enūntiō* as an introductory verb and *sē* as subject accusative of the infinitive, form expressions of Indirect Discourse, employing each of the three active forms of the infinitive of *dūcō* and translating each as in § 286.

(2) Do likewise with the perfect and future active of *enūntiō*.

289.

Ūnum iter per Sēquanōs erat inter montem Iūram et flūmen Rhodanum, angustum et difficile, quā singulī carrī vix¹ dūcerentur.² Perpaucī facile eōs prohibēre potuerunt. Mōns autem altissimus impendēbat ut perpaucī facile prohibēre possent.²

¹ Caesar places this adverb before quā, thus making it very emphatic and giving a superlative force to an adverb that could not be compared. For greater emphasis Caesar also places the adverb facile before perpaucī. Compare the position of these adverbs in the above and in the text in § 291.

² A clause of Result, see § 228.

ANCIENT CARTS.

LESSON XXXIX.

DEPONENT VERBS AND ABLATIVE WITH DEPONENTS.

291. *The Swiss must choose one of two roads in leaving home. The first of these, with narrow passes and overhanging mountains, traverses the Sequani.*

Erant omnīnō itinera duo, quibus itineribus domō exīre possent : ūnum per Sēquanōs, angustum et difficile, inter montem Iūram et flūmen Rhodanum, vix quā singulī carrī dūcerentur ; mōns autem altissimus impendēbat, ut facile perpaucī prohibēre possent.

THE ROAD NARROW AND DIFFICULT.

292. A deponent verb is one which is passive in form but active in meaning. Deponent verbs occur in all conjugations, and in the indicative and subjunctive are conjugated exactly like the passive voice of their respective conjugations, as may be seen by reference to the App., § 24. The participles and infinitives present peculiarities, which will be noted in the following paradigms.

293.

PARADIGMS.

PARTICIPLES AND INFINITIVES OF DEPONENT VERBS.

PRINCIPAL PARTS.

	I	II	III	IV
<i>Pres. Ind.</i>	cōnor	vereor	sequor	potior
<i>Pres. Inf.</i>	cōnāri	verēri	sequi	potiri
<i>Perf. Ind.</i>	cōnātus sum	veritus sum	secūtus sum	potītus sum

PARTICIPLES.

PRESENT.

cōnāns, <i>attempting</i>	verēns, <i>fearing</i>	sequēns, <i>following</i>	potiēns, <i>getting control</i>
---------------------------	------------------------	---------------------------	---------------------------------

FUTURE.

cōnātūrus, <i>going-to-attempt.</i>	veritūrus	secūtūrus	potitūrus
-------------------------------------	-----------	-----------	-----------

PERFECT.

cōnātus, <i>having attempted.</i>	veritus	secūtus	potītus
-----------------------------------	---------	---------	---------

GERUNDIVE.

cōnandus, <i>to be attempted.</i>	verendus	sequendus	potiendus
-----------------------------------	----------	-----------	-----------

Observe:—

That deponent verbs have all four participles: (a) present and future participles active in both form and meaning; (b) perfect participles passive in form and active in meaning; (c) gerundives passive, not only in form, but even in meaning, notwithstanding the nature of deponent verbs.

INFINITIVES.

PRESENT.

cōnāri, <i>to attempt</i>	verēri, <i>to fear</i>	sequi, <i>to follow</i>	potiri, <i>to get control</i>
---------------------------	------------------------	-------------------------	-------------------------------

PERFECT.

cōnātus esse, <i>to have attempted.</i>	veritus esse	secūtus esse	potītus esse
---	--------------	--------------	--------------

FUTURE.

cōnātūrus esse, <i>to be going-to-attempt.</i>	veritūrus esse	secūtūrus esse	potitūrus esse
--	----------------	----------------	----------------

Observe : —

That deponent verbs have three instead of six infinitive forms, and that they substitute the future active infinitive for the future passive. What are wanting ?

294.

MODEL SENTENCES.

- (1) Eōdem cōnsiliō ūsī sunt. — *They adopted the same plan.*
 (2) Imperiō tōtīus Galliae potītī sunt. — *They got control of the whole of Gaul.*

Observe : —

That in the English sentences *plan* and *control* are the direct objects of their verbs, while their Latin equivalents are put in the ablative though translated as direct objects.

295. RULE. — *Ūtor, fruor, fungor, potior, and vescor, with their compounds, govern an ablative translated as direct object.*

296.

VOCABULARY.

<i>Genitive</i>	vīs	vīrium
<i>Dative</i>	vī	vīribus
<i>Accusative</i>	vīm	vīrēs

The genitive and dative singular of **vīs** are rarely found.

302.

MODEL SENTENCES.

— *The Allobroges were not in good humor towards the Roman people.*

(2) Trium mēnsium molita cibāria domō efferunt. — *They carry from home flour for three months.*

Observe : —

(1) that in sentence 1 the bracketed phrase is used to describe the **Allobrogēs** by denoting a Quality; that this phrase contains both an adjective and a noun and is expressed by either the genitive or ablative. Unlike all other ablatives heretofore studied, the ablative of quality modifies nouns, either directly or as predicate.

(2) that in sentence 2 **mēnsium** denotes the Measure of Time, is modified by a numeral **trium**, and is expressed only by the genitive.

303. RULES. — 1. *The genitive or ablative is used to denote quality but only when modified by an adjective.*

2. *The genitive of quality with numerals is used to define measure of time, length, etc., and is then known as the genitive of measure.*

309. *Celer, celeris, celere* (base *celer-*) is a Third Declension adjective of Three Terminations. Memorize its declension in the App., § 10; also declension of *liber* in the App., § 8. Note their comparison below.

celer, celeris, celere

swift

liber, libera, liberum

free

celerior, -ius

swifter

liberior, -ius

freer

celerrimus, -a, -um

swiftest or very swift

liberrimus, -a, -um

freest or very free

Observe: —

That the comparative of the above adjectives is formed regularly by adding *-ior* and *-ius* to the base, but that the superlative is formed by adding *-rimus* to the masculine singular nominative of the positive.

All adjectives ending in *-er* are thus compared.

310. *facilis, -e* (base *facil-*), *easy*; *facilior, -ius*, *easier*; *facillimus, a, -um*, *easiest*.

Observe: —

That the comparative of this adjective is formed regularly, but that the superlative is formed by adding *-limus* to the base.

The following adjectives are similarly compared: *difficilis*, *difficult*, *dissimilis*, *unlike*, *gracilis*, *slender*, *humilis*, *low*, *similis*, *like*.

FUTP.	iverō (ierō)			

Transitive compounds of **eō** are fully conjugated in the passive. **Trānsitur, trānsitum est**, and the present infinitive **trānsiri** occur frequently.

Observe: —

(1) that **ī**, the present stem of **eō**, becomes **e** before a vowel in the present indicative and present subjunctive.

(2) that **eō** forms its future and imperfect indicative by adding to the present stem the tense signs of the First and Second Conjugations and the personal endings.

(3) that the **v** may be dropped in the forms based on the perfect stem. This letter is regularly dropped in compounds, as **trānsierant**.

Māgnā virtūte			
or			
Māgnā cum virtūte			

Observe:—

That in the above sentence Manner is expressed by the Ablative with the preposition **cum** when the noun in the phrase is not modified by an adjective, but that **cum** is preferably omitted when the noun is so modified. This is called the Ablative of Manner.

318. RULE.—*The manner of an action is denoted by the ablative with cum, but cum may be omitted when the ablative is modified by an adjective.*

319.

Observe:—

(1) that in these sentences the conjunction **cum** means *when* (its usual meaning) and introduces a clause expressing time.

(2) that in sentence 1 the verb of the subordinate clause refers to future time and takes the indicative.

(3) that in sentence 2 the verb of the subordinate clause refers to past time and takes the subjunctive.

320. RULE.—*A temporal clause with cum, when referring to present or future, regularly takes the indicative; when referring to the past, generally takes the imperfect or pluperfect subjunctive.*

SIXTH REVIEW.

I. List in a column and number with meanings the Latin nouns from which the following English words are wholly or partly derived: military, advent, malefactor, memorial, legionary, altitude, opera, itinerary, naval, pedal, principal, voluntary, faculty, injury, spacious, castle, munition, concourse, (sub)jugate, adding to this list the Latin nouns meaning: garrison, raft, missile.

II. List in a column and number the Latin adjectives meaning: good, great, bad, old, little, outward, below, following, above, much. Combine in G. N. C. agreement the comparative of each of these adjectives with the correspondingly numbered noun in I. Then decline these combinations consecutively, starting with the first.

III. Combine with the next ten nouns in I the superlative of each of the adjectives, the first adjective with the eleventh noun, the second adjective with the twelfth noun, etc. Then decline these combinations consecutively, starting with the first. While writing out such exercises, the student should prepare himself to give orally the meaning of each combination in its declined form.

IV. Combine in G. N. C. agreement and decline together in the plural the perfect passive participle of *iungō* and the Latin word for *raft*; in the singular only the present participle of *repellō* and the Latin word for *missile*.

V. List in a column and number with meanings and principal parts the Latin verbs from which the following English words are wholly or partly derived: refer, dejection, tenant, mission, imperative, response, (as)sume, volition, concession, temperance, repel, license, junction, intercession, revert, repellent, dispose, ostentation, mature, desist, (e)nunciate, adding to this list the Latin verbs meaning: arrive, come, kill.

VI. Write consecutive synopses as directed in the last review lesson of the first ten verbs of the list just formed in the third singular active and in the second plural passive, indicating by blanks defective forms.

VII. Tabulate consecutively with meanings the infinitives and participles of the last ten¹ verbs of the list, giving the present active infinitive of the fifteenth verb, the perfect active infinitive of the sixteenth, etc., ending with the gerundive or future passive participle of the twenty-fourth.²

VIII. List the Latin adverbs formed from the following adjectives and compare them: *celer*, *cupidus*, *nōbilis*, *bonus*, *facilis*, *malus*, *māgnus*, *multus*, *parvus*, *propior*.

IX. Decline in full in the positive the following adjectives of the Third Declension: *potēns*, *facilis*, *celer*.

X. Review the text at the head of Lessons XLIII–XLIX, pointing out all examples of the above rules occurring in these chapters.

XI. Translate into Latin the following phrases: after the return, under the mountain, without arms.

¹ The student will hardly need to be reminded that there are six infinitives (three active and three passive) and four participles, making ten in all, just enough to allow each verb one form.

² A model of this scheme will be found in the App., § 30. Note that this drill may be profitably extended by starting with other verbs than the one suggested.

LESSON L.

Caesarī renūtiātūr, Helvētiīs esse in animō, per agrum Sēquanōrum et Aeduōrum iter in Santonum finēs facere, quī nōn longē ā Tolōsātium finibus absunt, quae cīvitās est in prōvinciā. Id sī fieret, intellegēbat māgnō cum periculō prōvinciae futūrum, ut hominēs bellicōsōs, populī Rōmānī inimicōs, locīs patentibus māximēque frūmentāriīs fīnitimōs habēret.

392. The following compounds of the verb **sum** should be noted. All these verbs except **possum** are followed by the dative (§ 394).

MODEL SENTENCES.

(1) *Bellum fīnitimīs inferunt.* — *They make war upon their neighbors.* (2) *Labiēnus mūnitiōnī praeest.* — *Labiennus is in command of the fortification.*

Observe:—

(1) that each of the compound verbs in the above sentences governs the dative case.

(2) that the transitive verb **inferunt** in the first sentence is followed by the accusative **bellum** as the direct object of the verb and the dative **fīnitimīs** with the preposition **in** of the compound.

(3) that the intransitive verb **praeest** is followed by the dative alone with the preposition **prae** of the compound.

394. RULE. — *The dative is used with many verbs compounded with ad, ante, con, in, inter, ob, post, prae, prō, sub, super, and some with circum.*

Trēs legiōnēs, quae circum Aquilēiam hiemābant, ex hibernīs ēducit. Cum hīs quīnque legiōnibus ire contendit, quā proximum iter in ulteriōrem Galliam per Alpēs erat.

LESSON LIII.

GERUNDS AND GERUNDIVES.

399. *Leaving Labienus in command of the fortifications, Caesar returns to northern Italy, where he enlists two legions of raw recruits, making his total force twenty thousand men.*

Ob eās causās eī mūnitiōnī, quam fēcerat, T. Labiēnum lēgātum praeficit; ipse in Ītaliā māgnīs itineribus contendit duāsque ibi legiōnēs cōscribit et trēs, quae circum Aquilēiam hiemābant, ex hibernīs ēducit et, quā proximum iter in ulteriōrem Galliam per Alpēs erat, cum hīs quīnque legiōnibus ire contendit.

ROMAN LEGATUS AND
AIDES.

400. The gerundive is a verbal adjective of the First and Second Declension, always agreeing in G. N. C. with a noun or pronoun, as **urbis capiendae spēs**, *the hope of taking the city (of the city to-be-taken)*. The gerund is a verbal noun, never agreeing with but sometimes governing another noun or pronoun, as **urbem capiendī spēs**, *the hope of taking the city*. The gerund occurs in only four cases, the genitive, dative, accusative, and ablative. The nominative is regularly supplied by the infinitive used as subject.

PARADIGMS OF GERUNDS.

<i>Gen.</i>	liberandī, <i>of freeing</i>	movendī	dividendī	capiendī
<i>Dat.</i>	liberandō, <i>to or for freeing</i>	movendō	dividendō	capiendō
<i>Acc.</i>	liberandum, — <i>freeing</i>	movendum	dividendum	capiendum
<i>Abl.</i>	liberandō, <i>by freeing</i>	movendō	dividendō	capiendō

The gerunds of **impediō** and of all verbs of the Fourth Conjugation are formed exactly like those of **capiō**.

Observe: —

That the gerunds are the same in form as the corresponding cases of the neuter gerundive, otherwise known as the future passive participle, the forms of which in § 251 should now be reviewed.

401.

MODEL SENTENCES.

Nominative. Dicere nōn est facere. — Literally, *To say is not to do. Saying is not doing* (Infinitive instead of gerund as subject).

Genitive. (1) Spem urbis capiendae habēmus. — *We have hope of taking the city* (Gerundive). (2) Spem urbem capiendī habēmus. — *We have hope of taking the city* (Gerund).

Dative. (1) Hibernīs oppūgnandīs diem dixerunt. — *They named a day for attacking the winter quarters* (Gerundive). (2) Pūgnandō locum delēgerat. — *He had selected a place for fighting* (Gerund).

Accusative. (1) Ad eās rēs cōficiendās biennium est satis. — *Two years are enough for completing those plans* (Gerundive). (2) Ea ad proficiscendum pertinent. — *These things pertain to starting out* (Gerund).

Ablative. (1) In pāce petendā haec dixerunt. — *In seeking peace they said this* (Gerundive). (2) Multās rēs pollicendō Helvētiīs persuādet. — *He persuades the Swiss by promising many things* (Gerund).

Observe: —

(1) that in these sentences the gerundives agree in G. N. C. with the nouns in the construction, while the gerunds are nouns themselves and in their verbal nature may govern other nouns. The nouns with which the gerundives agree take the case required by their relation to the rest of the sentence, while with gerunds the verbals themselves take the required case.

(2) that when the verb is transitive and has a direct object, the gerundive construction is to be preferred.

FORMATION AND USES OF SUPINES.—WAYS OF EXPRESSING PURPOSE.

406. *Crushing the opposition of the Alpine tribes, Caesar rushes to the scene of the impending war.*

Ibi Ceutronēs et Graiocelī et Caturīgēs, locīs superiōribus occupātīs, itinere exercitum prohibēre cōnantur. Complūribus hīs proeliīs pulsīs, ab Ocelō, quod est ceteriōris prōvinciae extrēmum,

CAESAR'S ROUTE ACROSS THE ALPS.

407. The supine is a verbal noun of the Fourth Declension, having only two cases, the accusative in **um** and the ablative in **ū**. These are formed by adding **-um** and **-ū** to the participial stem.

PARADIGM OF SUPINES.

Acc.	liberātum	mōtum	divisum	captum	impeditum
	<i>to liberate</i>	<i>to move</i>	<i>to divide</i>	<i>to take</i>	<i>to impede</i>
Abl.	liberātū	mōtū	divisū	captū	impeditū
	<i>in liberating</i>	<i>in moving</i>	<i>in dividing</i>	<i>in taking</i>	<i>in impeding</i>

408.

MODEL SENTENCES.

(1) Lēgātōs ad Caesarem auxilium rogātum mittunt. — *They send ambassadors to Caesar to ask for help.* (2) Perfacile factū est cōnāta perficere. — *To accomplish their attempts is very easy to do (literally, in the doing).* (3) Helvētii omnēs virtūte praecedunt. — *The Swiss excel all in bravery.*

Observe: —

(1) that **rogātum**, the accusative of the supine, expresses purpose and is used with **mittunt**, a verb of motion.

(2) that **factū**, the ablative of the supine, states in what respect the accomplishment is easy, just as **virtūte** in sentence 3 states in what respect the Swiss excel all.

409. RULES. — 1. *The accusative of the supine is used with verbs of motion to express purpose.*

2. *The ablative of the supine is used with a few adjectives to denote specification.*

410. Six ways of expressing purpose have already been noted in our study of Latin as follows: —

Lēgātōs mittet	{	(1) ut auxilium rogent.
		(2) quī auxilium rogent.
		(3) auxilium rogandī causā.
		(4) auxiliī rogandī causā.
		(5) ad auxilium rogandum.
		(6) auxilium rogātum.

All six expressions may be translated: *he will send ambassadors to ask for help, or for the purpose of asking for help.*

Note that the gerund with an object, a rather infrequent construction, occurs only in (3).

411.

VOCABULARY.

auxilium, -ī, n., *aid, help* (plu. *auxiliary troops*).

dēfendō, -fendere, -fendī, -fēnsus, *ward off, defend.*

414. DEVELOPMENT EXERCISE.

Dum Caesar erat in Italiā, Helvētiī iam per angustias et per finēs Sēquanōrum suās cōpiās trādūxerant. Helvētiī iam in Aeduōrum finēs pervēnerant et eōrum agrōs populābantur. Aeduī, cum sē suaque (sē et suās rēs) ab iīs dēfendere nōn possent, lēgātōs ad Cæsarem mittunt rogātum auxilium.

SEVENTH REVIEW.

I. List in a column with meanings and number the Latin nouns from which the following English words are wholly or partly derived: via(duct), benefit, gracious, auxiliary, itinerary, diary, military, hostile, adding to the list the Latin words for hostage, narrow-pass, and voluntarily.

II. Decline consecutively the first ten of the above nouns, starting with the first and putting **prior** in G. N. C. agreement with each singular form and **primus** with each plural form.

III. List in a column and compare when possible the Latin adjectives meaning: farther, fertile, former, hither, nearer, new, seventh, wintry.

IV. List in a column and number with principal parts and meanings the Latin verbs from which the following words are wholly or partly derived: relinquish, studious, renunciation, intelligence, prefect, traduce, educe, petition, defend, adding to the list the verb meaning to obtain one's request.

V. Write consecutive synopsis in the 1st plural active of these ten verbs.

VI. Tabulate consecutively with meanings as in the last review lesson the infinitives and participles of these ten verbs, noting that some of these verbs are defective in certain infinitive and participial forms. Write with meanings the gerunds of the first verb and the supines of the fourth.

VII. Review the rules of syntax for Dative of Possessor, Dative with Compounds, and illustrate each with an original Latin sentence properly translated.

VIII. Review the text at the head of Lessons L–LIV inclusive, pointing out in these chapters all examples of the rules mentioned above.

LESSON LV.

CONJUGATION OF THE VERB *FĪŌ*.—COMPOUNDS OF *FACĪŌ*.

415. *During Caesar's absence, the Swiss fall upon the fields of the Aeduians, who send urgent appeals to him for help.*

Helvētīī iam per angustiās et finēs Sēquanōrum suās cōpiās trādūxerant et in Aeduōrum finēs pervēnerant eōrumque agrōs

populābantur. Aeduī, cum sē suaque ab iīs dēfendere nōn possent, lēgātōs ad Caesarem mittunt rogātum auxilium.

GRAIN FIELDS ALONG THE ROUTE OF THE SWISS MARCH.

416. The verb **fiō** is used as an intransitive verb (*to become* or *happen*) and also as the passive voice of **faciō**. In its latter use it may be translated passively (*to be made, be done*) even when active in form. Observe that the *i* in **fiō** is long though it occurs before another vowel. This peculiarity is found in all forms of **fiō** unless the vowel is followed by *-er*, as in the present infinitive **ferī**. Memorize the conjugation of **fiō** in the App., § 28.

417. The following compounds of **faciō** should be noted:—

- afficiō** (*do to*), *affect, afflict*, Perf. Pass. Par., *affectus*.
cōnficiō (*make together*), *accomplish, complete*, P. P. P. *cōnfectus*.
interficiō (*make between*), *kill, put to death*, P. P. P. *interfectus*.
perficiō (*do thoroughly*), *accomplish*, P. P. P. *perfectus*.
praefficiō (*make before*), *put at head of*, P. P. P. *praefectus*.
commonefaciō (*cum-mone-*), *remind*, P. P. P. *commonefactus*.
patefaciō (*pateō, lie open*), *open, disclose*, P. P. P. *patefactus*.
satisfaciō (*satis, enough*), *satisfy, apologize, make restitution to* (with dative), P. P. P. *satisfactus*.

Observe: —

That when **faciō** is compounded with a preposition, as in the first five examples, the **-a** of the stem is modified to **-i**, producing **-ficiō**. (Compare **incipiō**, **recipiō**.) Compounds of **faciō** with verbs or adverbs, as in the last three examples, do not modify **-a** of the stem and use **fiō** in the passive, as **patefaciō**, passive **patefiō**.

Compounds of **faciō** with prepositions do not use **fiō** in forming their passive voice, but follow the model of **io** verbs of the Third Conjugation as **afficiō**, passive **afficior**.

418.

421. DEVELOPMENT EXERCISE.

Hī lēgātī haec dīxērunt: "Ita omnī tempore dē populō Rōmānō meritī sumus ut paene in cōspectū exercitūs Rōmānī nostrī agrī vāstārī nōn dēbuerint."¹ Dīxērunt ita sē dē populō Rōmānō meritōs esse ut liberī eōrum in servitūtem abdūcī nōn dēbuerint,¹ ut oppida eōrum expūgnārī nōn dēbuerint.¹ Ambarrī erant necessārī et cōsanguineī Aeduōrum. Ambarrī, necessārī et cōsanguineī Aeduōrum, Caesarem certiōrem faciunt dē suīs iniūriīs. Ambarrī haec² dīxērunt: "Agrīs dēpopulātīs, vim hostium ab oppidīs nōn facile prohibēmus." Caesarem certiōrem faciunt sēsē, agrīs dēpopulātīs, ab oppidīs³ vim hostium nōn facile prohibēre.

ONE OF THE AUXILIA.

¹ *Dēbuerint* is perfect subjunctive in a result clause after a past time tense. Transl. *vāstārī nōn dēbuerint*, *ought not to have been laid waste*.

² *Haec, ea*, and similar words when used in the neuter plural relate to a statement which is to follow and may be translated *as follows*.

³ Note how *oppidīs* is strongly emphasized by placing it before *vim hostium*. The Romans indicated emphasis by the order of the words instead of depending upon vocal stress as we do in English.

LESSON LVI.

THE PERIPHRASTIC CONJUGATIONS.—DATIVE OF AGENT.

422. *The Aeduans feel that their past services to the Romans entitle them to protection from the ravages of the Swiss barbarians.*

Ita sē omnī tempore dē populō Rōmānō meritōs esse, ut, paene in cōspectū exercitūs nostrī, agrī vāstārī, liberī eōrum in servitūtem abdūcī, oppida expūgnārī nōn dēbuerint. Eōdem tempore Ambarrī, necessārī et cōsanguineī Aeduōrum, Caesarem certīōrem faciunt sēsē, dēpopulātīs agrīs, nōn facile ab oppidīs vim hostium prohibēre.

423. Just as the perfect passive participle is compounded with **sum** to form the perfect, pluperfect, and future perfect passive tenses, so the future active and future passive participles are compounded with **sum** to form what are known as the periphrastic conjugations.

The *First* or *Active Periphrastic* conjugation is formed by combining the future active participle with the various tenses of the verb **sum**; as, **liberātūrus sum**, *I am about to, intend to, or am going to liberate*. From these meanings it will be seen that the *Active Periphrastic* is future in sense and expresses expectation or intention.

The *Second* or *Passive Periphrastic* conjugation is formed by combining the gerundive, or future passive participle, with the various tenses of the verb **sum**; as, **liberandus sum**, *I am to be, must be, ought to be liberated*. From these meanings it will be seen that the *Passive Periphrastic* expresses necessity, obligation, or propriety.

In these combinations the tenses of the verb **sum** have their usual force. Note, however: **liberandus fui**, *I was to be or had to be freed*; **liberandus fueram**, *I had had to be freed*; **liberandus fuerō**, *I shall have had to be freed*.

424.

MODEL SENTENCES.

(1) Omnia Caesarī faciēda erant. — *Everything had to be done by Caesar or Caesar had to do everything.* (2) Mōns Labiēnō capiendus est. — *The mountain is to be seized by Labienus or Labienus must seize the mountain.*

Observe: —

That in each of the above sentences the person who must or ought to perform the act is put in the dative. This dative is called the Dative of Agent.

425. *RULE.* — *Agency with the gerundive is expressed by the dative.*

426.

Quibus (= hīs) rēbus adductus, Caesar statuit nōn exspectandum esse.⁴ Caesar statuit nōn exspectandum⁴ dum omnēs fortūnae sociōrum cōnsūmerentur, aut dum, omnibus fortūnis sociōrum cōnsūptīs, Helvētiī in Santonōs pervenirent.

¹ Translate both passively and actively.

² This sentence must be turned into the passive voice before the Second Periphrastic can be used. The subject of the active form becomes what case?

³ Genitive of the whole; nihil reliquī, nothing of remainder, i.e. nothing was left.

⁴ Translate actively, he should not wait.

LESSON LVII.

INTERROGATIVES AND INDEFINITES.—INTERROGATIVE PARTICLES.

430. *Caesar decides that he cannot afford to wait until the Swiss strip his allies of their property.*

Item Allobrogēs, quī trāns Rhodanum vicōs possessiōnēsque habēbant, fugā sē ad Caesarem recipiunt et dēmōnstrant sibi

praeter agrī solum nihil esse reliquī. Quibus rēbus adductus Caesar nōn expectandum sibi statuit, dum, omnibus fortunīs sociōrum cōsumptīs, in Santonōs Helvētīi pervenirent. [Cap. XI. Finis.]

431. Like Demonstratives and Relatives, Interrogatives and Indefinites are used both as pronouns and adjectives: **quis**, *who?* **quī homō**, *what man?* (Interrogatives) and **quis**, *any one*, **quī homō**, *any man* (Indefinites).

<i>Abl.</i>	quō, <i>by, from, in, or with whom?</i>	quō, <i>by, from, in, or with what?</i>

The plural is the same as that of the Relative, **quī, quae, quae**.

434.

INTERROGATIVE (used as adjective).

These are declined throughout singular and plural like the Relative.

	M.	F.	N.	meaning of all genders
<i>Nom.</i>	quī	quae	quod	<i>who? what? which? what kind of?</i>

Indefinites, whether pronouns or adjectives, are declined like the corresponding Interrogative, but **qua** is commonly used for **quae** except in the feminine plural nominative.

435. The Indefinites **quis** and **quī** are rare except after **sī**, **nisi**, **nē**, **num**. In other situations, the student should make use of the compounds shown in the following table:—

M.	F.	N.
quis	(qua)	quid (quod), <i>somebody, anybody.</i>
aliquis (aliquī)	(aliqua)	aliquid (aliquod), <i>some one.</i>
quisquam		quicquam, <i>any one (at all) (no plu.).</i>
quīdam	quaedam	quiddam (quoddam), <i>a certain one.</i>
quisque	(quaeque)	quidque (quodque), <i>each one, every one.</i>
quīvis	quaevis	quidvis (quodvis), <i>any one (you please).</i>

The bracketed forms are used as adjectives. The pronominal parts alone of the compounds are declined and these like the corresponding forms of **quis** or **quī**. Note, however, a euphonic change of **m** to **n** before **d**, showing **quendam**, **quandam**, **quōrundam**, etc.

436.

MODEL SENTENCES.

DIRECT QUESTIONS.

(1) Quid facit?—*What is he doing?* (2) Quod oppidum oppūgnat?—*What town is he attacking?* (3) Nōnne Caesar hōc facit?—*Is not Caesar doing this?* or *Caesar is doing this, is he not?* (Implied answer, "Yes.") (4) Num Caesar hōc facit?—*Caesar is not doing this, is he?* (Implied answer, "No.") (5) Caesare hōc facit?—*Is Caesar doing this?* (Answer uncertain.)

Observe:—

(1) that questions 1 and 2 cannot be answered by *yes* or *no*, while the other questions may be so answered. After carefully studying the other questions, observe,

(2) that the interrogative particle **nōnne** is used when the answer expected is *yes*, that **num** is used when the answer expected is *no*, that the enclitic particle **-ne** is used when the question gives no indication as to the nature of the answer. This enclitic

is always attached to the most emphatic word, which is usually placed first in the sentence. Note how the emphasis is altered in the following:—

Idne Caesar facit? — *Is it this that Caesar is doing?*

LESSON LXII.

PERSONAL PRONOUNS.—POSSESSIVE ADJECTIVES.

471. *Caesar bridges the Saone and throws his army across. In alarm, the Swiss send an embassy of peace.*

Hōc proeliō factō, reliquās cōpiās Helvētiōrum ut cōsequi posset, pontem in Ararī faciendum cūrat atque ita exercitum trādūcit. Helvētiī repentinō eius adventū commōtī, cum id, quod ipsī diēbus xx aegerrimē cōfēcerant, ut flūmen trānsirent, illum unō diē fēcisse intellegerent, lēgātōs ad eum mittunt, cuius lēgātōnis Dīvicō prīnceps fuit, qui bellō Cassiānō dux Helvētiōrum fuerat.

472. Since the personal endings of Latin verbs indicate the person of the subject, the nominative of **Personal Pronouns** is used only when needed for emphasis, contrast, or clearness. Memorize the declension of the pronouns *ego*, *I*, and *tū*, *you*, in the App., § 15. The personal pronoun of the third

person, *he, she, it*, is lacking in Latin, and when not reflexive, is expressed usually by *is, ea, id*, sometimes by *hic* or *ille*. What is the third person reflexive in Latin?

473. Possessive Adjectives are formed from the genitive of the personal pronouns as follows:—

PERSON.	GENITIVE.	POSSESSIVE ADJECTIVE.
1st Sing.	<i>mei, of me</i>	<i>meus, -a, -um, my or mine.</i>
Plu.	<i>nostrī, of us</i>	<i>noster, -tra, -trum, our or ours.</i>
2d Sing.	<i>tui, of you</i>	<i>tuus, -a, -um, your or yours.</i>
Plu.	<i>vestrī, of you</i>	<i>vester, -tra, -trum, your or yours.</i>
3d Sing.	<i>sui, of him, etc.</i>	<i>suus, -a, -um, his, her, its, or their (own),</i>
or Plu.		<i>according to the subject, to which the reflexive, suus, must refer.</i>

When not referring to the subject, the possessive adjective of the third person is supplied by the use in the singular and plural, respectively, of the genitive of the demonstrative *is, ea, id*; namely, *eius, his, her, its*, and *eōrum* or *eārum, their*.

474.

MODEL SENTENCES.

(1) *Ego oppidum oppugnō, tū dēfendis.* — *I attack the town, you defend it.* (2) *Mē liberō, vōs liberātis.* — *I free myself, you free yourselves.* (3) *Quis vestrum veniet, nam vestrī cupidī sumus?* — *Who of you will come, for we are fond of you?* (4) *Nostrōs nōbiscum dūcēmus.* — *We shall lead our (men) with us.*

Observe:—

(1) that *ego* and *tū* are used in sentence 1 because they are contrasted and emphatic.

(2) that as in sentence 2 the first and second persons of the personal pronouns may be used reflexively.

(3) that the genitive form *vestrum* is partitive and *vestrī* is objective, as in sentence 3. *Nostrum* and *nostrī* must be likewise distinguished.

(4) that in sentence 4 *nostrōs* is used substantively and that the preposition *cum* is enclitic with personal pronouns as well as with relative, interrogative, and reflexive pronouns.

475.

LESSON LXIII.

CONDITIONAL SENTENCES.*

478. *The aged Divico haughtily defies Caesar.*

Dīvicō ita cum Caesare ēgit: † “Sī pācem populus Rōmānus faciet, nōs Helvētiī in eam partem ibimus atque ibi erimus, ubi volueris.¹ Sī bellō persequī vīs, tenē memoriā vetus proelium et prīstinam virtūtem Helvētiōrum. Ūnum pāgum adortus es, cum iī, quī flūmen trānsierant, nostrīs auxilium ferre nōn possent.² Ob eam rem nōlī³ nōs dēspicere. Nōs ita ā maiōribus patribusque didicimus: virtūte, nōn īnsidiīs, nīti oportēre. Quārē nōlī committere ut is locus, ubi cōsistimus, ex calamitāte populī Rōmānī nōmen capiat.”

479. A **Conditional Sentence** is complex and consists of two parts: the subordinate clause called the **condition** or **protasis**, and the principal clause called the **conclusion** or **apodosis**; as, *if he attacks* (protasis), *he will be defeated* (apodosis).

480. Conditional sentences are classified as follows:—

I. Conditions referring to Present and Past Time.

(a) Simple.

(b) Contrary to Fact.

II. Conditions referring to Future Time.

(a) More Vivid Future.

(b) Less Vivid Future.

* See Syntactical Syllabus regarding Conditions, page 281.

† This speech is a condensed version in direct discourse of the original text, whose indirect form presents serious difficulties. The same liberty has been taken in treating Caesar's reply in Lesson LXIV. All words of these portions of the original text occurring six or more times in Caesar have been used in these versions.

¹ Future perfect, translated as present indicative.

² Translated by same tense of indicative.

³ *Be unwilling to*, i.e. *do not*.

481.

SUBDIVISIONS.

I. Conditions referring to Present and Past Time.

(a) Simple Conditions.

PRES. *If he has anything, he gives it.*

SĪ quid habet, dat.

PAST. *If he had anything, he gave it.*

SĪ quid habēbat, dedit.

Observe: —

That these conditions are stated simply without implying anything as to their truth, and the indicative is used in both clauses.

(b) Conditions Contrary to Fact.

PRES. *If he had anything, he would give it.*

SĪ quid habēret, daret.

PAST. *If he had had anything, he would have given it.*

SĪ quid habuisset, dedisset.

Observe: —

(1) that the protases of these sentences imply what is contrary to fact: he has or had nothing and therefore can or could give nothing.

(2) that the subjunctive is used in both clauses, the imperfect in the present contrary to fact and the pluperfect in the past contrary to fact.

II. Conditions referring to Future Time.

(a) More Vivid Future.

If he has anything, he will give it.

SĪ quid habēbit, dabit.

(b) Less Vivid Future.

If he should have anything, he would give it.

SĪ quid habeat, det.

Observe: —

(1) that the protasis in (a) states the future supposition vividly and distinctly and implies the probability of the action in the

apodosis. In this form of conditional sentence both clauses take the indicative. In English the present tense is used in the protasis though referring to future time, while Latin is more precise and uses the future or sometimes the future perfect.

(2) that the protasis in (b) states the future supposition less vividly and distinctly and implies the uncertainty or mere possibility of the action in the apodosis. In this form of conditional sentence both clauses take the present subjunctive. Of what forms are the two conditions used in § 478 ?

482.

SUMMARY OF CONDITIONS.

I. Conditions referring to Present or Past Time.

(a) Simple. Indicative in both clauses.

(b) Contrary to Fact $\left\{ \begin{array}{l} \text{PRES. — Imperfect subjunctive in} \\ \text{both clauses.} \\ \text{PAST. — Pluperfect subjunctive in} \\ \text{both clauses.} \end{array} \right.$

II. Conditions referring to Future Time.

(a) More Vivid. Future indicative in both clauses.

(b) Less Vivid. Present subjunctive in both clauses.

Eō respōnsō datō, discessit.

487. A **Direct Question** gives the exact words of a speaker or writer. An **Indirect Question** gives the words of a speaker or writer as reported by another or by the same person after a verb of asking, knowing, doubting, and the like, followed by an interrogative pronoun, adjective, adverb, or particle.

DIRECT QUESTION.

INDIRECT QUESTION.

Quid Caesar facit? — *What is Caesar doing?*

Rogat quid Caesar faciat. — *He asks what Caesar is doing.*

Observe: —

That the indicative **facit** in the Direct Question becomes the subjunctive **faciat** in the Indirect Question.

488. RULE. — *The verb in an indirect question is put in the subjunctive.*

489.

491. *RULE.* — *A primary tense is followed by the subjunctive present for incompleted action, perfect for completed action. A secondary tense is followed by the subjunctive imperfect for incompleted action, pluperfect for completed action.*

vidētur (sometimes impersonal in passive), *it seems, seems good.*

Intransitive Verbs and the Special Verbs followed by the dative (§ 254) are regularly used impersonally in the passive voice, retaining the dative, as: *pūgnātur*, *it is fought, there is fighting*; *Orgetorigī persuādētur*, *Orgetorix is persuaded* (literally, *it is persuaded to Orgetorix*).

DOUBLE ACCUSATIVES.

503. *The Swiss, puffed up over their cavalry victory, attack Caesar from their rear guard. He avoids battle, while preventing them from ravaging the country.*

Quō proeliō sublātī Helvētīī, quod quīngentīs equitibus tantam multitudinē equitum prōpulerant, audācius subsistere nōn numquam et novissimō agmine proeliō nostrōs lacessere coepērunt. ACROSS THIS COUNTRY MARCHED THE OPPOSING ARMIES.

504. Double Accusatives in Latin are of two classes:—

I. Two Accusatives of the Same Person or Thing.

MODEL SENTENCES.

(1) *Senātus Catamantāloedem amīcum appellāverat.* — *The senate had called Catamantaloedes a friend.* (2) *Labiēnum certiorēm fēcērunt.* — *They informed Labienus (literally, made Labienus more certain).* (3) *Divicōnem ducem Helvētīi dēlēgērunt.* — *The Swiss chose Divico as leader.* (4) *Divicō dux ab Helvētīis dēlēctus est.* — *Divico was chosen as leader by the Swiss.*

Observe:—

(1) that these verbs govern two accusatives, a direct object, as **Catamantāloedem** or **Divicōnem**, and a predicate accusative, as **amīcum** or **ducem**.

(2) that the predicate accusative may be an adjective, as **certiorēm** in sentence 2.

In changing such a sentence into the passive voice, as sentence 3 into 4, the direct object becomes subject and the predicate accusative becomes predicate nominative.

505. RULE. — *Verbs of calling, choosing, making, and the like may take two accusatives of the same person or thing.*

506. II. Two Accusatives: the one of the Person, the other of the Thing.

MODEL SENTENCES.

(1) *Aeduī Caesarem auxilium rogāvērunt.* — *The Aedui asked aid of Caesar.* (2) *Caesar Aeduōs frūmentum flāgitābat.* — *Caesar kept asking the Aedui for grain.*

Observe:—

That these verbs take two accusatives, the one of the Person, as **Caesarem** and **Aeduōs**, and the other of the Thing, as **auxilium** and **frūmentum**.

507. RULE. — *Some verbs of asking, demanding, and teaching take two accusatives, the one of the person, the other of the thing.*

508.**VOCABULARY.**

DEVELOPMENT EXERCISE.

Interim cotīdiē Caesar Aeduōs frūmentum flāgitābat. Frūmentum, quod Aeduī publicē pollicitī essent, Caesar flāgitāre.¹ Gallia, ut ante dictum est, sub septentriōnibus posita est. Nam propter frīgora, quod Gallia sub septentriōnibus posita est, frūmenta² in agrīs mātūra nōn erant. Nōn modo frūmenta in agrīs mātūra nōn erant, sed nē pābulī quidem satis māgna cōpia suppetēbat. Caesar frūmentum flūmine Ararī nāvibus subvexerat. Eō autem frūmentō, quod Ararī subvexerat, ūtī minus poterat. Eō frūmentō ūtī minus poterat proptereā quod Helvētīi iter ab Ararī āvertērant. LESSON LXVII.

OPTATIVE SUBJUNCTIVE.

512. *Caesar, in danger of starvation, urgently calls upon his allies for promised supplies. His food supplies afloat on the Saone prove unavailable because the Swiss have left that river.*

Interim cotīdiē Caesar Aeduōs frūmentum quod essent pūblicē pollicitī flāgitāre. Nam propter frīgora, quod Gallia sub septentrionibus (ut ante dictum est) posita est, nōn modo frūmenta in agrīs mātūra nōn erant, sed nē pābulī quidem satis māgna cōpia suppetēbat; eō autem frūmentō quod flūmine Ararī nāvibus subvexerat propterea minus ūtī poterat, quod iter ab Ararī Helvētīi āverterant, ā quibus discēdere nōlēbat.

513. Before studying the model sentences given below, review carefully the subjunctive in Conditional Sentences as set forth in §§ 480–482.

MODEL SENTENCES.

(1) Utinam Caesar adsit. — *Oh that Caesar may be here.* (In the Future.) (2) Utinam Caesar adesset. — *Oh that Caesar were here.* (In the Present.) (3) Utinam Caesar adfuisset. — *Oh that Caesar had been here.* (In the Past.)

Observe: —

That each of these sentences expresses a wish and takes the **Optative Subjunctive**; that the present subjunctive expresses a wish as possible of accomplishment in the future; the imperfect and

pluperfect subjunctive express the wish as unaccomplished in the present and past respectively.

These tenses of the Optative Subjunctive correspond exactly to the tenses of the Less Vivid Future and of the Contrary to Fact conditions. The particle **utinam**, *oh that, would that*, is sometimes omitted with the present subjunctive, but never with the imperfect or pluperfect. In negative wishes **nē** is used as an introductory particle, as **Nē adsit Caesar**, *oh that Caesar may not be here*.

514. RULE. *Wishes are expressed by the optative subjunctive with utinam affirmative, nē negative.*

515.**VOCABULARY.**

nex, necis, f., *violent death, murder, slaughter.*

potestās, potestātis, f., *power.*

vergobretus, -i, m., the title of the chief magistrate of the Aedui.

comportō, 1, *bring together, collect.*

516.**WRITTEN WORK.**

(1) Write synopses of **īnstō** in the 3d plural active and **conferō** in the 3d plural passive.

(2) Tabulate with meanings the gerunds and supines of **creō** and the infinitives and participles of **convocō**.

517.**EXERCISES FOR PRACTICE.**

(1) **Utinam Caesar auxiliō Aeduīs veniat.** (2) **Utinam frūmenta in agrīs mātūra fuissent.** (3) **Utinam Caesar frūmentum mīlitibus mētīrī posset.** (4) **Nē Helvétīī omnēs cōpiās Genāvam convocārent.** (5) **Utinam Caesar Rōmae hōc annō cōnsul creārētur.** (6) **Nē obsidēs ab prīncipibus interficiantur.** (7) **Equitēs caveant nē ab hostibus repellantur.** (8) **Rōmānī virtūte contendant magis quam īnsīdiīs nītantur.**

II. (1) May the Swiss not grieve on account of their change of fortune. (2) Oh that the immortal gods may give us greater prosperity. (3) Would that we had not been impeded by the flight of our allies. (4) Would that we had followed up the enemy very boldly. (5) Oh that the day of return were at hand.

518. DEVELOPMENT EXERCISE.

Diem ex diē Aeduī dūcēbant¹ et dīcēbant frūmentum cōferrī, comportārī, adesse. Diem ex diē dūcere² Aeduī et dīcere² cōferrī, comportārī, adesse. Sē diūtius dūcī intellēxit. Intellēxit diem īnstāre quō diē frūmentum mīlitibus mētīrī oportēret.³ Ubi ea omnia intellēxit, prīncipēs eōrum convocāvit. Convocātīs eōrum prīncipibus, quōrum māgnam cōpiam in castrīs habēbat, graviter eōs accūsāt. In hīs prīncipibus erant Dīviciācus et Liscus, quī summō magistrātūī praeerat. Eum magistrātum vergobretum appellant Aeduī, quī creātur annuus et potestātem vītae necisque in⁴ suōs habet. Convocātīs eōrum prīncipibus, in hīs Dīviciācō⁵ et Liscō, graviter eōs accūsāt.

¹ dūcēbant, kept leading him on, i.e. putting him off.

² The infinitives dūcere and dīcere are historical; the others are in indirect discourse. As to case of Aeduī, see Note 1, page 201.

³ oportēret, it would be necessary.

⁴ in, translate over.

⁵ Dīviciācō et Liscō, appositives of prīncipibus.

LESSON LXVIII.

SUBORDINATE CLAUSES IN INDIRECT DISCOURSE. — *QUOD* CAUSAL.

519. *The Aedui put off Caesar with excuses until he loses patience with them, and calling together their leaders, bitterly upbraids them.*

Diem ex diē dūcere Aeduī: cōferrī, comportārī, adesse dīcere. Ubi sē diūtius dūcī intellēxit et diem īnstāre, quō diē frūmentum

militibus mētiri oportēret, convocātis eōrum p̄ncipibus, quōrum māgnam cōpiam in castris habēbat, in hīs Diviciacō et Liscō, quī summō magistratūi praeerat, quem ‘vergobretum’ appellant Aeduī, quī creātur annuus et vitae necisque in suōs habet potestātem, graviter eōs accūsāt.

520.

(1) Aeduī frūmentum, quod dēbent, nōn cōferunt. — *The Aedui do not collect the grain which they ought.* (2) Caesar dicit Aeduōs frūmentum, quod dēbeant, nōn cōferre. — *Caesar says that the Aedui do not collect the grain which they ought.* (3) Quod ab eīs nōn sublevātus est, Caesar p̄ncipēs convocāt. — *Caesar calls together the leaders, because he has not been assisted by them.* (4) Caesar Aeduōs accūsāt quod ab eīs nōn sublevātus sit. — *Caesar blames the Aedui, because (as he says) he has not been aided by them.*

Observe: —

(1) that sentence 1 is a complex sentence, whose subordinate verb dēbent is in the indicative mood.

(2) that when sentence 1 is thrown into indirect discourse after verb of saying, as in sentence 2, the verb of the subordinate clause dēbent becomes the subjunctive dēbeant.

521. *RULE.* — *A subordinate clause in indirect discourse takes the subjunctive.*

Observe: —

That in sentence 3 the subordinate clause is in direct discourse, expresses cause, and takes the indicative, while in sentence 4 the subordinate causal clause is in indirect discourse after accūsāt, a verb of saying, and therefore takes the subjunctive.

522. *RULE.* — *Causal clauses with quod take the indicative in direct discourse, the subjunctive in indirect discourse.*

523.

(b) The multiples of *centum*, *ducentī*, *-ae*, *-a*, etc. are declined like the plural of *lātus*.

I. List in a column with meanings and index as formerly directed the Latin nouns numbered 126, 127, 128, and the Latin adjectives numbered 92, 93, 94, in the Word List on pages 275-278.

II. List in a column with principal parts and meanings the Latin verbs numbered 147-171, inclusive, in the Word List on pages 275-278.

Conjugate consecutively both in the present indicative and present subjunctive active the first six of these verbs as follows: the 1st singular of the first, the 2d singular of the second, the 3d singular of the third, the 1st plural of the fourth, etc.¹

In like manner conjugate in the perfect indicative active and passive, the second six verbs, in the future indicative the third six, and in the imperfect subjunctive the last six.

¹ A model of this scheme will be found in the App. § 30.

IV. List in a column and number the verbs meaning: *set out, attempt, follow, use, attack, promise, get possession of*. Noting that all of the above verbs are deponents, tabulate consecutively with meanings the infinitives and participles.

CHAPTERS XVIII-XXIX INCLUSIVE

OF

THE GALLIC WAR.

CONTINUING THE STORY OF CAESAR'S FIRST CAMPAIGN.

NOTE. — The student has now studied all forms and principles necessary to the reading of Caesar. The remainder of the story of the First Campaign must be read by reference to the general vocabulary, and with the aid of Development Exercises, which will no longer attempt to give a connected account of the story, but will be limited to a treatment of those sentences likely to present difficulty in their original form. Indirect Discourse will generally be simplified by giving in the Development Exercises the equivalent Direct Discourse, as has been done in the exercise immediately following. The English-Latin exercises occurring at the end of each chapter should be divided by the teacher into as many parts as the days required to complete a chapter. Lack of time may necessitate the omission of some of the sentences, but should not be permitted to crowd out of consideration the review of the principles involved as indicated by the references preceding each exercise. The sentences numbered in heavy type contain those constructions of most frequent occurrence, as indicated in the Syntactical Syllabus.

539.

LIST OF FIVE HUNDRED WORDS.

Compiled from the Vocabulary of High School Latin with the permission of the author, Dr. Gonzales Lodge, of the Teachers College, Columbia University. This classified list consists of words occurring in Caesar's First Campaign and used six or more times in the first five books of the Gallic War. The progressive and intelligent teacher will have no difficulty in appreciating the value of this word list as an aid in the acquisition of a practical vocabulary and in the annotation of sight passages, which may thus be marked with scientific accuracy.

SYNTACTICAL SYLLABUS.

NOTE.— A knowledge of what constructions occur most frequently in Caesar enables the teacher by intelligent emphasis to increase the efficiency of his class in examinations and sight reading. Such accurate knowledge should be an indispensable qualification for one who sets an examination or test. Many constructions upon which we spend much time in teaching first and second year Latin are found so rarely as to deserve no attention. The statistics are drawn from Heynacher, one of those patient German toilers who would attempt to count and classify the sands of the sea, were scholarship to be aided thereby.

CASE CONSTRUCTIONS.

Nominative as Subject naturally most frequently.
 Predicate Nominative also frequently.

Genitive:

- (1) **Possessive** more than 1000 times.
- (2) **Partitive** 366 times.
- (3) **Objective** with Nouns or Adjectives. 200 times.

This construction with verbs such as remembering, forgetting, and impersonals occurs but 3 times, and in these phases may be disregarded.

- (4) **Quality:** (*alias* Descriptive) 82 times.

No other genitive occurs more than 3 times.

Dative:

- (1) **Compound Verbs** 225 times.
- (2) **Purpose** 88 times.
- (3) **Adjectives** 63 times.
- (4) **Special Verbs** (*alias* Intransitives) 40 times.
- (5) **Agent** (only in the 2d periphrastic) 26 times.
- (6) **Possessor** with *sum* 18 times.
- (7) **Interest** (*alias* Advantage) a few times.

The next most frequent construction is the **Ethical Dative**, occurring but 5 times.

Accusative :

- | | |
|--|----------------------------|
| (1) Direct Object | naturally most frequently. |
| (2) Place to Which (Limit of Motion). . . | very frequently. |
| (3) Compound Verbs (ad-, circum-, per-, trāns-) | 79 times. |
| (4) Extent | 37 times. |

Under this construction may be grouped 52 occurrences of Extent in Degree, often called Adverbial Accusative, *e.g.* **multum, plūs, plūrimum.**

- | | |
|---|-----------|
| (5) Predicate (Double Accusatives) | 70 times. |
|---|-----------|

The cognate accusative, two accusatives with verbs of teaching and concealing do not occur at all and should not be taught in first or second year work.

Ablative :

- | | |
|--|-------------|
| (1) Absolute | 770 times. |
| (2) Means | 600 times. |
| (3) Agency | frequently. |
| (4) Separation (including Place Whence) | 300 times. |

Statistics fail to give precise figures for other ablative constructions, but with an aggregate of 7000 occurrences of this case, none of the constructions commonly taught in the grammars will be found to occur less times than many of the genitive and dative constructions already enumerated. So none may be safely neglected. The other common ablative constructions are :

- | | |
|------------------------------|-----------------------------------|
| (5) Accompaniment. | (11) Ūtor, etc. |
| (6) Specification. | (12) Quality. |
| (7) Cause. | (13) Manner. |
| (8) Time When. | (14) Comparison. |
| (9) Place From Which. | (15) Degree of Difference. |
| (10) Place In Which. | |

MODE CONSTRUCTIONS.

Subjunctive: (no detailed statistics—relative frequency only indicated).

- (1) **Subordinate Clauses Indirect Discourse.**
- (2) **Indirect Question.**
- (3) **Purpose:** (a) Pure Final, (b) Substantive, (c) Relative.
- (4) **Result.**

The following occur so much less frequently that no distinction as to types is advisable.

- (5) **Quod Causal.**
- (6) **Cum Causal and Concessive.** (Latter 18 times.)
- (7) **Cum Temporal** with secondary tenses.

With one exception **Conditions**, though very common in Caesar, are involved in the intricacies of Indirect Discourse and their study may in the judgment of the authors be more profitably postponed until the reading of Cicero. Meantime in Caesar they may be intelligently treated as Subordinate Clauses in Indirect Discourse without explaining the subtleties of the tenses. Conditions have been introduced into the Caesar's First Campaign only with reluctance and in deference to conventional practice, leaving it to the individual teacher's judgment as to whether they should be taught. The same may be said of **priusquam** clauses, only 8 of which occur outside of Indirect Discourse in the four books. **Dum** in the sense of *until* occurs only 4 times; **quoad**, *until*, once; and **donec** not at all. The Hortatory, Jussive, Potential, and Optative Subjunctives occur only in Indirect Discourse.

Infinitive :

- (1) In Indirect Discourse.
- (2) Complementary (including infinitive as object).
- (3) As Subject of Impersonals.

The Historical Infinitive occurs but six times in Caesar.

Supines :

The supine in **um** occurs 10 times in the four books; that in **u** but once, I, 3, 6.

Gerunds and Gerundives :

- | | |
|---|------------|
| (1) Accusative with ad | 86 times. |
| (2) Genitive of Gerund modifying substantives
(inclusive of causā and grātiā) | 128 times. |
| (3) Ablative with dē or in | 21 times. |
| (4) Gerundive with cūrō | 17 times. |
| (5) The Gerundive in the genitive with suī | 10 times. |

Other uses of the Gerund are very rare.

TWENTIETH CENTURY TEXT-BOOKS.

THE CLASSICAL SERIES.

A Latin Grammar for Schools.

By ANDREW FLEMING WEST, Ph. D., LL. D.,
Professor of Latin and Dean of the Graduate School,
Princeton University. 12mo. Cloth, 90 cents.

This book has been prepared for *schools* and for beginners in Latin. It is limited to the things most essential for the young pupil to know—the things he can grasp and use in reading his school authors.

The aim has been to state only the essentials, to define them as simply as the facts warrant, and to give as much explanation as will fasten them firmly in the mind. This involves the rejection of all unnecessary technical terms, unimportant exceptions, formal and pedantic modes of expression, and all refinements of doctrine that properly enter only after the school stage. As far as possible, everything has been put in a concrete way, that the pupil may see in his grammar the satisfying explanation of living usage, rather than the dissection of a lifeless material.

This grammar has kept strictly in view the developments in the teaching of Latin in our schools during the last ten years. It is planned to carry out fully the spirit of the resolutions on the subject adopted by the National Educational Association on recommendation of the American Philological Association. The author has taught Latin in both the Western high school and the Eastern academy, as well as in the college. During his whole career, his relations with secondary school work, particularly with the formulation of the program of Latin studies recently adopted by the National Educational Association, have been most intimate and constructive.

TWENTIETH CENTURY TEXT-BOOKS.

Caesar's Commentaries.

By JOHN H. WESTCOTT, Ph.D., Professor of Latin and Tutor in Roman Law, Princeton University. Edition of seven books, \$1.25. Edition of four books, \$1.10.

In the introduction to this volume the editor presents the character of Cæsar to the student not merely as the conqueror of Gaul and the author of the Commentaries, but as a real human being—one of the most powerful factors in the history of the world. Two editions have been issued: one containing the whole of the seven books; the other the first four books only, omitting text and notes of Books V, VI, and VII, leaving the introduction and vocabulary the same. The vocabulary is brief and compact, without such scientific and philological matter as would be beyond the grasp of the average high-school pupil. The text is fully and appropriately illustrated, notably in regard to the account of Cæsar's army, its organization, tactics, military engineering, etc. The notes to Books I and II are unusually full and comprehensive, containing many grammar references; the notes to the last books are briefer, directed mainly to following the narrative and allowing more rapid reading of the text. A bibliography is given, suggesting the best books for the teacher's collateral reading or study.
